unlocking agile's missed potential agile has not delivered on its promises the business side expected faster time to market but they still experience the long delays of bloated releases engineers thought they would be given time to build the product right the first time but they are rushed under pressure to deliver new features within impossible schedules what went wrong the culprit is feature based waterfall release planning perpetuated in a vain attempt to achieve business predictability agile didn't address the business need for multi year financial predictability the agile community's answer was the naïve response the business needs to be more agile waterfall release planning with fixed schedules undercuts a basic tenet of agile development the need to adjust content delivered within a timebox to account for evolving requirements and incorporation of feedback agile without flexible content is not agile this book introduces a novel solution that enables product teams to deliver higher value within shorter cycle times while meeting the predictability needs of the business organizations today want product teams that break down walls between product management and engineering to achieve schedule and financial objectives until now they haven't had a way to implement product teams within the rigid constraints of traditional organizational structures the investment planning approach described in this book supports small development increments planned and developed by product teams aligned by common schedule and financial goals it uses cost of delay principles to prioritize work with the highest value and shortest cycle times investments provide a vehicle for collaboration and innovation and fulfill the promise of highly motivated self directed agile development teams this book is for engineers product managers and project managers who want to finally do agile the way it was envisioned this book is also for leaders who want to build high performance teams around the inherent motivational environment of agile when done right foreword by steve mcconnell author of more effective agile a roadmap for software leaders construx press 2019

only about 10 30 percent of the planned strategies are ultimately realized however the recipes for success often seem quite simple if this is the case the question inevitably arises as to why our success rate is often so low moreover the average lifespan of an organization is shorter than a human life what can organizations do to perform better and how can we ensure our survival and develop the ability to transform and adapt especially in the age of digitalization and industry 4 0 however top management spends less than three percent of their time shaping the long term future even if this figure is questionable it is an indicator that there is enormous potential to create our future much better it is our challenge as managers or entrepreneurs intrapreneurs to think without limits and to prepare and shape the future any straitjacket in thinking especially in innovation must be eliminated it is time to familiarize you with the concept of the strategic control loop and the tudapol principle unlimited thinking agile development lean production and operation this principle should enable you to meet the management challenges in the age of globalization increasing complexity and digital transformation
