shortlisted for the 2021 society for army historical research s temple medal operation crusader launched in november 1941 was the third and final british attempt to relieve the siege of tobruk and break the german and italian forces in north africa after tough initial fighting the british made important gains only to be countered by a stunning breakthrough overseen personally by Lt general erwin rommel as the british situation teetered the commander of the 8th army Lt general alan cunningham was relieved of duty by his superior general claude auchinleck this decision changed the direction of the battle and perhaps the war itself why and how cunningham was relieved has been the subject of commentary and speculation since it occurred using newly discovered evidence alexander joffe rethinks the events that brought about the sudden relief of the operation s commanding officer including insubordination the book then discusses how narratives regarding the operation were created were incorporated into british and commonwealth official and unofficial historical writing about the war and contributed to british historical memory based on a decade of archival work the book presents a new and detailed analysis of a consequential battle and importantly of how its history was written and received in the context of post war britain

official history is a misunderstood genre of historical writing which attracts much negative comment from non official historians but about which very little detail is actually known this book examines the development of official history programs in canada south africa australia and new zealand over the course of the twentieth century looking at the ways in which they developed and the contributions each made to their respective national historiography the second part of the work develops some themes from the first and takes the official histories of the second world war as case studies drawing on programs in australia britain and the united states these essays examine the relationship between the histories the historians and their sponsoring institutions they assess the impact of the histories on historical understanding of the second world war they also consider the impact that contemporary events during the cold war had on the writing of the official history

The Last Word?

the first edition 1981 took a critical look at the accepted wisdom of historians who interpreted battlefield events primarily by reference to firepower it showed that wellington s infantry had won by their mobility rather than their musketry that the bayonet did not become obsolete in the nineteenth century as is often claimed and that the tank never supplanted the infantryman in the twentieth a decade later the author has been able to fill out many parts of his analysis and has extended it into the near future the napoleonic section includes an analysis of firepower and fortification notably at the battle of new orleans in 1815 additional discussions of the tactics of the american civil war have been included the evolution of small unit tactics in the first world war is next considered then the problem of making an armored breakthrough in the second world war following is a discussion of the limitations of both the helicopter and firepower in vietnam the author points to some of the

lessons learned by the u s military and the doctrine which resulted from that experience concluding is a glimpse at the strangely empty battlefield landscape that might be expected in any future high technology conflict

sir geoffrey cox described sidi rezeqh fought during operation crusader in libya over november and december 1941 as the forgotten battle of the desert war the objective of crusader was to retake cyrenaica the eastern region of libya and ultimately drive the italians and germans out of north africa the campaign also involved british and south african troops and did achieve the badly needed relief of tobruk despite the new zealand division s major role and the importance of this campaign in achieving british victory in north africa it has largely been neglected by historians failing to receive as much attention as crete el alamein or cassino yet more new zealand soldiers were killed or taken prisoner during crusader than in any other campaign fought by the div during the war peter cox whose father fought at sidi rezeqh draws on his experience of twice visiting the battlefield to tell the story of this complex and costly campaign he sets the scene for the fighting in libya describes the unforgiving and inhospitable desert landscape follows the stages of the action itself and recounts the often moving and heroic stories of the new zealanders who fought there many never returned home this is both a very accessible account of a significant new zealand contribution to world war ii and a tribute to the thousands of men who took part in this punishing battle

military professionals and theorists have long understood the relevance of morale in war montgomery the victor at el alamein said following the battle that the more fighting i see the more i am convinced that the big thing in war is morale jonathan fennell in examining the north african campaign through the lens of morale challenges conventional explanations for allied success in one of the most important and controversial campaigns in british and commonwealth history he introduces new sources notably censorship summaries of soldiers mail and an innovative methodology that assesses troop morale not only on the evidence of personal observations and official reports but also on contemporaneously recorded rates of psychological breakdown sickness desertion and surrender he shows for the first time that a major morale crisis and stunning recovery decisively affected eighth army s performance during the critical battles on the gazala and el alamein lines in 1942

the campaign in north africa during world war two was one of the most important of the conflict the allies fought for control of north africa against the german afrika

korps led by rommel but the part played by mussolini s italian troops and in particular the armoured divisions in support of the germans is not so well known this painstakingly researched book looks in detail at the role of mussolini s three armoured divisions ariete littorio and centauro and the invaluable part they played in rommel s offensive between 1941 and 1943 indeed the author is able to show that on many occasions the presence and performance of the italian armoured divisions was crucial to the success of the axis campaign

it took the japanese fleet twenty two days to sail from japan to pearl harbor the same twenty two days that witnessed the german assault on moscow and the crusader battles in north africa the germans failed to knock the soviets out the japanese succeeded in bringing the americans in these twenty two days sealed their mutual fate with each chapter structured around one of the twenty two days leading up to pearl harbor sealing their fate narrates the battles the preparations for battle the diplomatic manoeuvres and the intelligence wars the story shifts from snowbound russian villages to the stormy northern pacific from the north african desert to europe s warring capitals and from tokyo to washington the book features a host of ordinary soldiers sailors and airmen and those political and military figures who played a key role in the war taking the momentum of the japanese fleet sealing their fate works as an exciting countdown other countdowns the gradual halting of the german advance in russia the erosion of rommel s resources in north africa the institutionalization of the holocaust is worked into this basic structure as winston churchill memorably remarked hitler s fate was sealed mussolini s fate was sealed as for the japanese they would be ground to powder all the rest was merely the proper application of overwhelming force

the siege of tobruk was the longest in british military history the coastal fortress and deep water port was of crucial importance to the battle for north africa and the key that would unlock the way to egypt and the sues canal for almost a year the isolated garrison held out against all attempts to take it and in the process tobruk assumed a propaganda role that outweighed its great strategic value becoming a potent symbol of resistance when the war was going badly for the british goebbels referred to the garrison as rats and they proudly adopted the insult as a title and became the rats of tobruk when it finally fell to german tanks on 21 june 1942 with the loss of 25 000 men churchill said it was one of the heaviest blows i can recall during the war william f buckingham s startling account drawing extensively on official records and first hand accounts from both sides is a comprehensive history of this epic struggle and essential reading for anyone with an interest in the western desert campaign

most histories of the u s army in world war ii view the mediterranean theater of operations primarily as a deadly training ground for very green forces where lessons learned on the beaches of oran in the hills of the kasserine pass area and at the collapse of the tunis bridgehead all contributed to later success in western europe steven barry however contends that victory in the mto would not have materialized without the leadership of battalion level commanders they operated at a high level

despite the lack of combat experience for themselves and their troops ineffective leadership at higher levels and deficiencies in equipment organization and mobilization Barry portrays these officers as highly trained adaptable and courageous in their first combat experiences in North Africa and Sicily their leadership he argues brought discipline maturity experience and the ability to translate common operational guidance into tactical reality and thus contributed significantly to battlefield success in North Africa and Sicily in 1942-1943 to explain how this happened he examines their prewar experiences including professional military education and unit training exercises personal factors such as calmness and physical resilience under fire and the ability to draw upon doctrine creatively apply the resources at their disposal and clearly define and communicate mission goals and means he also reveals how battalion leaders incorporated technological innovations into combined arms maneuvers by employing tank capabilities and close air support doctrine as Barry's assessment shows these battalion commanders were not the sole reason for the Allied triumph in North Africa and Sicily but victory would not have been possible without the special brand of military leadership they exhibited throughout those campaigns under their leadership even inexperienced units were able to deliver credible combat performance and without the regular army battalion leaders US units could not have functioned tactically early in the war one of the few studies to focus on tactical adaptation at the battalion level in conventional warfare Barry's book attests to the pivotal value of professional military education and makes an important contribution to today's organizational learning debate while providing an in-depth view of adaptation of US infantry and armored forces in 1942-1943

this is the first comprehensive study based on a detailed textual analysis of the classical works on war by clausewitz sun tzu mao tse tung and to a lesser extent jomini and machiavelli brushing stereotypes aside the author takes a fresh look at what these strategic thinkers actually said not what they are widely believed to have said he finds that despite their apparent differences in terms of time place cultural background and level of material technological development all had much more in common than previously supposed in fact the central conclusion of this book is that the logic of waging war and of strategic thinking is as universal and timeless as human nature itself this third revised and expanded edition includes five new chapters and some new charts and diagrams
