the computer aided prototyping system caps is an integrated environment comprised of an integrated set of software tools aimed at rapidly prototyping hard realtime embedded systems the problem with the current caps software development environment is the absence of a caps user s manual how to use which provides caps users with step by step guidelines on how to use the caps tools one solution to this problem was solved by designing developing and creating online documentation for the caps

user manual and graphic editor reference manuals for caps release 1 1 such an approach provides accessible visual graphical and textual step by step illustrations for caps users when interfacing and manipulating commands and options within the caps user interface subsystem and graphic editor tool in addition this approach includes a glossary which helps caps users to understand the meaning of the difficult or specialized terms used in this environment
