PC Mag 1988-09-27 p b learn to use a one light approach for recreating the look of beautiful natural window light for portraiture b p p at its best natural light is magical for portraiture the quality of natural light streaming through a window can be extraordinary gorgeous wrapping light that flatters your subject and can be used to create multiple looks for years photographer sandra coan exclusively used natural light in her portraiture work and while the results could be magnificent she also learned that she could not rely on it to build a business and create consistently great photographs that s because natural light is frustratingly unpredictable sometimes it rains sometimes the light is too harsh when your clients are available and sometimes depending on the time of year it s just too dark p p in order to grow her business with dependably great results and a high level of professionalism sandra finally decided to tackle artificial light she spent years honing her ability to use artificial light to recreate the look of beautiful natural light and now with a simple one light approach she produces natural light whenever and wherever she likes creating great portraits in any situation at any time of day or night it s an approach that has led to a successful career spanning two decades and a signature look to her work here in i crafting the natural light look i sandra shares her knowledge and techniques so that you too can learn to quickly and dependably create the look of natural light in your own portraiture unlike other books that address artificial light sandra s tone is conversational and easygoing and she does not

cover everything there is to know about artificial light in fact there are no two or three light setups here instead sandra s method is straightforward and easily actionable she covers p ul the key characteristics of light intensity distance direction ul ul equipment strobes flashes light meters triggers receivers modifiers reflectors and light stands including what she uses and what she recommends if starting out on a budget ul ul shutter speed and its relationship with artificial light ul ul where to position the light and the subject for consistent flattering results ul ul creating four lighting patterns and looks with one setup flat light loop light side light and backlight ul ul using a light meter to determine the perfect flash power whether you shoot film or digital ul ul working with individuals families and groups ul ul the role of shadows in its contribution to the drama and mood of a portrait ul ul common mistakes and how to avoid them ul ul what she does in post production very little ul p finally in a series of case studies she brings it all together and shares her thought process as she works through a number of real world portrait shoots from start to finish if you re a natural light photographer who s been either struggling with flash or reluctant to learn it at all i crafting the natural light look i is exactly the book you need to improve the quality and consistency of your portraiture p
