the heart wikipedia May 28 2024 the heart is a muscular organ that pumps blood through the blood vessels of the circulatory system. In humans, the heart is located in the chest cavity, between the lungs, and is roughly the size of a fist. It is composed of four chambers: the right and left atria and ventricles. The heart pumps oxygenated blood to the rest of the body and deoxygenated blood back to the lungs. The heart was first described by the ancient Egyptians around 1983 BC. The first anatomical drawing of the heart was made by Leonardo da Vinci in 1488. The first heart transplant was performed in 1966 by Dr. Christiaan Barnard. The heart is a vital organ and its failure can lead to death.
