drilling and production wells are becoming more digitalized as oil and gas companies continue to implement machine learning and big data solutions to save money on projects while reducing energy and emissions up to now there has not been one cohesive resource that bridges the gap between theory and application showing how to go from computer modeling to practical use methods for petroleum well optimization automation and data solutions gives today's engineers and researchers real time data solutions specific to drilling and production assets structured for training this reference covers key concepts and detailed approaches from mathematical to real time data solutions through technological advances topics include digital well planning and construction moving teams into onshore collaboration centers operations with the best machine learning ml and metaheuristic algorithms complex trajectories for wellbore stability real time predictive analytics by data mining optimum decision making and case based reasoning supported by practical case studies and with references including links to open source code and fit for use matlab r julia python and other standard programming languages methods for petroleum well optimization delivers a critical training guide for researchers and oil and gas engineers to take scientifically based approaches to solving real field problems bridges the gap between theory and practice from models to code with content from the latest research developments supported by practical case study examples and questions at the end of each chapter enables understanding of real time data solutions and automation methods available specific to drilling and production wells such as digital well planning and construction through to automatic systems promotes the use of open source code which will help companies engineers and researchers develop their prediction and analysis software more quickly this is especially appropriate in the application of multivariate techniques to the real world problems of petroleum well optimization

manipulation pattern recognition and machine learning for smart robots part v pattern recognition and machine learning for smart robots robotic tactile sensation perception and applications advanced sensing and control technology for human robot interaction knowledge based robot decision making and manipulation design and control of legged robots part vi design and control of legged robots robots in tunnelling and underground space robotic machining of complex components clinically oriented design in robotic surgery and rehabilitation visual and visual tactile perception for robotics part vii visual and visual tactile perception for robotics perception interaction and control of wearable robots marine robotics and applications multi robot systems for real world applications physical and neurological human robot interaction part viii physical and neurological human robot interaction advanced motion control technologies for mobile robots intelligent inspection robotics robotics in sustainable manufacturing for carbon neutrality innovative design and performance evaluation of robot mechanisms part ix innovative design and performance evaluation of robot mechanisms cutting edge research in robotics

Wolf Creek Generating Station Unit 1, Operation 1982

electronic business today is not only business transactions supported in information and communication technologies it is a new way of communicating and integrating with customers suppliers employees and other stakeholders in this scenario electronic business is now part of a wider economic context that is causing radical transformations in business and organizations including the entire value chain from customer service to supply chain management one of the areas affected is marketing given that the new technologies have enabled firms to reach out to global customers and has provided them with the opportunity to customize their strategies and offerings in an unprecedented way the dynamics of marketing must be surveyed in order to study the impact of new trends like mobile customer relationship management or mass customization on marketing function this book provides an overview of the e business and marketing areas by uniting various papers from these fields electronic business and marketing includes theory and practice on electronic business and marketing from an academic and professional viewpoint providing also a forum for the exchange of research ideas and industry practices in these knowledge areas among practitioners researchers and students

Life Cycle Analysis and Assessment in Civil Engineering: Towards an Integrated Vision 2018-10-31

Intelligent Robotics and Applications 2023-11-06

this book presents the state of the art technology in serious games which is driven extensive by applications and research in simulation the topics in this book include 1 fashion simulation 2 chinese calligraphy ink diffusion simulation 3 rehabilitation 4 long vehicle turning simulation 5 marine traffic conflict control 6 cnc simulation 7 special needs education the book also addresses the fundamental issues in simulation and serious games such as rapid collision detection game engines or game development platforms the target audience for this book includes scientists engineers and practitioners involved in the field of serious games and simulation the major part of this book comprises of papers presented at the 2012 asia europe workshop on serious games and simulation held in nanyang technological university singapore may 9 2012 all the contributions have been peer reviewed and by scientific committee members with report about quality content and originality

Electronic Business and Marketing 2013-04-06

i 300 migliori fondi è una guida pratica e utile per muoversi nel vasto universo dei fondi comuni di investimento uno strumento di facile consultazione studiato per tutte le tipologie di investitori e operatori del settore quale supporto nella scelta dei prodotti più adatti alle loro esigenze all'interno del volume il lettore potrà consultare il rating assegnato da cfs rating l'analisi delle performance il commento e la view sui mercati dei gestori lo spaccato di portafoglio l'analisi indipendente realizzata da cfs rating e tante altre informazioni utili da acquisire

un manuale per corsi di diritto dei trasporti dell'unione europea una branca di crescente complessità segnata da una fortissima interrelazione fra concorrenza aiuti di stato servizi di interesse economico generale tutela dei consumatori il volume dopo una introduzione sulle principali disposizioni comunitarie è diviso in cinque moduli i trasporto aereo ii trasporto ferroviario iii servizi portuali iv trasporto locale e piattaforme digitali v diritti dei passeggeri il volume comprende le più importanti decisioni delle corti ue che hanno aperto e configurato il mercato per servizi di trasporto trans europei

i 300 migliori fondi è una guida pratica e utile per muoversi nel vasto universo dei fondi comuni di investimento uno strumento di facile consultazione studiato per tutte le tipologie di investitori e operatori del settore quale supporto nella scelta dei prodotti più adatti alle loro esigenze all'interno del volume il lettore potrà consultare il rating assegnato da cfs rating l'analisi delle performance il commento e la view sui mercati dei gestori lo spaccato di portafoglio l'analisi indipendente realizzata da cfs rating e tante altre informazioni utili da acquisire prima di investire in un fondo all'interno le nostre rubriche storiche best 300 i migliori fondi di investimento categoria per categoria over 10 years le gestioni più efficienti dell'ultimo decennio temi di approfondimento piani individuali di risparmio 2020 pir 3 0 il rilancio definitivo sri il focus sul social responsible investing e sui processi di investimento esg best performer 2019 e nuove proposte i fondi che hanno ben performato nel 2019 e le novità presenti sul mercato

I 300 MIGLIORI FONDI - Edizione 2024 2024-03-25T00:00:00+01:00

this book constitutes the thoroughly refereed proceedings of the 16th international conference on knowledge based intelligent information and engineering systems kes 2012 held in san sebastian spain in september 2012 the 21 revised papers were carefully reviewed and selected from 254 submissions topics of interest include the exploitation of ai techniques most recent research in information technologies and dynamic ontologies

2020-10-23

in this 2012 edition of advances in knowledge based and intelligent information and engineering systems the latest innovations and advances in intelligent systems and related areas are presented by leading experts from all over the world the 228 papers that are included cover a wide range of topics one emphasis is on information processing which has become a pervasive phenomenon in our civilization while the majority of information processing is becoming intelligent in a very broad sense major research in semantics artificial intelligence and knowledge engineering supports the domain specific applications that are becoming more and more present in our everyday living ontologies play a major role in the development of knowledge engineering in various domains from semantic down to the design of specific decision support systems research on ontologies and their applications is a highly active front of current computational intelligence science that is addressed here other subjects in this volume are modern machine learning lattice computing and mathematical morphology the wide scope and high quality of these contributions clearly show that knowledge engineering is a continuous living and evolving set of technologies aimed at improving the design and understanding of systems and their relations with humans
