Recommended Practice for Lighting and the Visual Environment for Seniors and the Low Vision Population 2016

rp 28 16 is intended to increase the designers understanding of age related vision loss and the importance of their design decisions that could impact the safety and independence of this growing sector of the population in the 2007 edition applications were primarily directed at housing and senior care facilities but in the 2016 edition coverage has been expanded to new areas of interest including offices hospitality healthcare commercial and places of assembly rp 28 16 has also been revised to serve a wider range of users including individuals design professionals owners managers of commercial buildings code and regulatory agencies and legislative bodies it is well understood that healthcare costs will increase as our elderly population ages as the united states braces for this huge economic impact appropriate lighting and a supportive visual environment should be considered as a preventive measure to reduce the risk of falls sleep disorders and long term care and therefore given a top priority by all code officials governmental agencies and the tax paying public
