AGRICOLA User's Guide

1984

this book contains a collection of quantitative procedures in common use in pharmacology and related disciplines it is intended for students and researchers in all fields who work with drugs many physicians especially those concerned with clinical pharmacology will also find much that is useful the procedures included may be considered core since they are generally applicable to all classes of drugs some of the procedures deal with statistics and hence have even wider application in this new edition we have increased the number of procedures from 33 in the first edition to 48 other procedures have been revised and expanded yet the basic philosophy of this new edition remains unchanged from the first that is the pharmacologic basis of each procedure is presented along with the necessary formulas and one or more worked examples an associated computer program is included for each procedure and its use is illustrated with the same worked example used in the text the discussions of theory and the sample computations are brief and self contained so that all computations can be made with the aid of a pocket calculator and the statistical tables contained in appendix a yet it is realized that the proliferation of lower priced microcomputers is likely to mean that more and more readers will utilize a computer for most calculations accordingly we have modified the format of the book to facilitate computer usage

Langley Atmospheric Information Retrieval System (LAIRS): System Description and User's Guide

1982

written as a companion to transformer and inductor design handbook second ed this work compiles the specifications of over 12 000 industrially available cores and brings them in line with standard units of measurement simplifying the selection of core configurations for the design of magnetic components

Manual of Pharmacologic Calculations

2012-12-06

good no highlights no markup all pages are intact slight shelfwear may have the corners slightly dented may have slight color changes slightly damaged spine

Magnetic Core Selection for Transformers and Inductors

21st European Symposium on Computer Aided Process Engineering

2011-07-21

this is a straightforward implementor s guide to integrated

services digital network isdn showing telecommunications managers how to implement both narrow and broadband isdn the standards involved and the problems encountered summers focuses on the specific standards used for implementing both n isdn and b isdn and on specific isdn implementation and concerns

the national computer security center is issuing a guide to understanding security testing and test documentation in trusted systems as part of the rainbow series of documents our technical guidelines program produces in the rainbow series we discuss in detail the features of the department of defense trusted computer system evaluation criteria dod 5200 28 std and provide guidance for meeting each requirement the national computer security center through its trusted product evaluation program evaluates the security features of commercially produced computer systems together these programs ensure that users are capable of protecting their important data with trusted computer systems the specific guidelines in this document provide a set of good practices related to security testing and the development of test documentation this technical guideline has been written to help the vendor and evaluator community understand what deliverables are required for test documentation as well as the level of detail required of security testing at all classes in the trusted computer system evaluation criteria dtic
