history of the state of vermont for the use of families and schools the acknowledged want of a concise history of vermont adapted to the use of the higher classes in our schools as well as for general reading is deemed a sufficient apology for adding another to the multifarious publications of the day the early history of vermont is unlike that of any other state in the union as the inhabitants on the new hampshire grants had never been organized as a province under the crown of england and as they constantly refused submission to the provincial governments which claimed authority over them they found themselves without any bond of union excepting their common interests and their social affections the history of vermont is therefore that of a people assuming the powers of self government and advancing by successive steps from a state of nature to tho establishment of a civil compact and to a regular and efficient organization about the publisher forgotten books publishes hundreds of principles fundamentally included in the term self government in fact its history upon utmost analysis discloses that no people organized as a state have more nearly attained to perfect sovereignty or maintained it under their constitution and political methods than the people of vermont the original stock according to a census more than a century old was composed almost wholly of english and scotch and was therefore anglo saxon in its quality that carried with it considering only insignificant changes in its character the virtues of their institutions language and literature and what is equally important however derived the fine character of anglo saxon intellectual and moral life vermont in the american revolution had reason for and might have profited by serving england but its people under a lofty leadership saw fit to espouse the cause which under providence has led to stupendous advances in the history of civilization and created a nation which outruns all others in its achieved results for man its people came of stock which held education religion freedom of person and honest dealings in chief regard and they were ready in sustaining these assets of sovereignty to work excerpt from history eastern vermont when six years ago i began to make researches for the purpose of ascertaining at what time the first settlements were made in vermont on the banks of the connecticut river by the whites it was my intention if i put pen to paper to write but a small book and to treat only of the southeastern portions of the state as i continued my investigations i became convinced that it would be very difficult to carry out this plan in an intelligible manner without introducing into my contemplated work much that would appear too general for its narrow limits at the same time i discovered that the disputes in which new york new hampshire and vermont were so long engaged respecting the jurisdiction of the latter state exerted an influence at the time which told on the progress and development of every town and village and hamlet in vermont i then sought for some publication containing a clear and full statement of these disputes my search was unrewarded i found that the natural and civil history of vermont by the learned dr samuel williams was more particularly devoted to the discussion of questions of a scientific nature and to a general account of the condition of the northern frontier of the united states than to a specific description of the settlement and growth of vermont i found that the natural and political history of the state of vermont prepared by col ira allen while in london and printed at a london press abounded in inaccuracies and was only minute in the narration of affairs with which the author had been connected i found that the descriptive sketch of the present state of vermont by dr john andrew graham was little else than a collection of unreliable gossiping entertaining letters written more for self gratification than to subserve any worthy or permanent interest about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book appendix was published in 1842 the boundary line between the united states and the british provinces was um settled and in dispute between the two governments but in the latter part of the summer of that year the matter was ami eably arranged by a treaty formed by mr webster and lord ashburton and ratified by the two governments the northern boundary of the state was intended to be along the 45th parallel of latitude and was supposed to be on that parallel till the sur vey of 1818 proved the 45th parallel to be some distance to the southward of what had been previously regarded as the northern boundary of the state cutting off a strip through the whole width varying from one fourth of a mile to a few rods by the treaty the northern boundary of the state was established upon the old well known line without reference to the 45th parallel this line was marked in 1845 by cutting away the timber where it passed through forests and by putting up cast iron posts at short distances through its whole length about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical Good Night Vermont 2011-11-14

excerpt from history eastern vermont when six years ago i began to make researches for the purpose of ascertaining at what time the first settlements were made in vermont on the banks of the connecticut river by the whites it was my intention if i put pen to paper to write but a small book and to treat only of the southeastern portions of the state as i continued my investigations i became convinced that it would be very difficult to carry out this plan in an intelligible manner without introducing into my contemplated work much that would appear too general for its narrow limits at the same time

i discovered that the disputes in which new york new hampshire and vermont were so long engaged respecting the jurisdiction of the latter state exerted an influence at the time which told on the progress and development of every town and village and hamlet in vermont i then sought for some publication containing a clear and full statement of these disputes my search was unrewarded i found that the natural and civil history of vermont by the learned dr samuel williams was more particularly devoted to the discussion of questions of a scientific nature and to a general account of the condition of the northern frontier of the united states than to a specific description of the settlement and growth of vermont i found that the natural and political history of the state of vermont prepared by col ira allen while in london and printed at a london press abounded in inaccuracies and was only minute in the narration of affairs with which the author had been connected i found that the descriptive sketch of the present state of vermont by dr john andrew graham was little else than a collection of unreliable gossiping entertaining letters written more for self gratification than to subserve any worthy or permanent interest about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

excerpt from appendix to the history of vermont natural civil and statistical 1853 when the history of vermont to which this is an appendix was published in 1842 the boundary line between the united states and the british provinces was um settled and in dispute between the two governments but in the latter part of the summer of that year the matter was ami eably arranged by a treaty formed by mr webster and lord ashburton and ratified by the two governments the northern boundary of the state was intended to be along the 45th parallel of latitude and was supposed to be on that parallel till the sur vey of 1818 proved the 45th parallel to be some distance to the southward of what had been previously regarded as the northern boundary of the state cutting off a strip through the whole width varying from one fourth of a mile to a few rods by the treaty the northern boundary of the state was established upon the old well known line without reference to the 45th parallel this line was marked in 1845 by cutting away the timber where it passed through forests and by putting up cast iron posts at short distances through its whole length about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
