The DISAM Journal of International Security Assistance Management 2012 what is the relationship between religion and multi player online roleplaying games are such games simply a secular distraction from traditional religious practices or do they in fact offer a different route to the sacred in egods a leading scholar in the study of virtual gameworlds takes an in depth look at the fantasy religions of 41 games and arrives at some surprising conclusions william sims bainbridge investigates all aspects of the gameworlds religious dimensions the focus on sacred spaces the prevalence of magic the fostering of a tribal morality by both religion and rules programmed into the game the rise of cults and belief systems within the gameworlds and how this relates to cults in the real world the predominance of polytheism and of course how gameworld religions depict death as avatars are multiple and immortal death is merely a minor setback in most games nevertheless much of the action in some gameworlds centers on the issue of mortality and the problematic nature of resurrection examining everquest ii lord of the rings online rift world of warcraft star wars the old republic and many others bainbridge contends that gameworlds offer a new perspective on the human quest one that combines the arts simulates many aspects of real life and provides meaningful narratives about achieving goals by overcoming obstacles indeed bainbridge suggests that such games take us back to those ancient nights around the fire when shadows flickered and it was easy to imagine the monsters conjured by the storyteller lurking in the forest arguing that gameworlds reintroduce a curvilinear model of early religion where today as in ancient times faith is inseparable from fantasy egods shows how the newest secular technology returns us to the very origins of religion so that we might arrive where we started and know the place for the first time

InDesign CS for Macintosh and Windows 2001 true myth examines the meaning and significance of myth as understood by c s lewis and joseph campbell and its place in the christian faith in a technological society c s lewis defined christianity and being truly human as a relationship between thepersonal creator and his creation mediated through faith in his son jesus the influential writer and mythologist joseph campbell had a different perspective understanding christianity as composed of mythical themes similar to those in other religious and secular myths while accepting certain portions of the biblical record as historical campbell taught the theological and miraculous aspects as symbolic as stories in which the reader discovers what it means to be human today in contrast lewis presented the theological and the miraculous in a literal way although lewis understood how one could see symbolism and lessons for life in miraculous events he believed they were more than symbolic and indeed took place in human history in true myth james w menzies skilfully balances the two writers differing

approaches to guide the reader through a complex interaction of myth with philosophy media ethics history literature art music and religion in a contemporary world
