A Subject Index of the Modern Works Added to the Library of the British Museum in the Years 1880-[95]: 1891-1895 1897 british chemistry has traditionally been depicted as a solely male endeavour however this perspective is untrue the allure of chemistry has attracted women since the earliest times despite the barriers placed in their path women studied academic chemistry from the 1880s onwards and made interesting or significant contributions to their fields yet they are virtually absent from historical records comprising a unique set of biographies of 141 of the 896 known women chemists from 1880 to 1949 this work attempts to address the imbalance by showcasing the determination of these women to survive and flourish in an environment dominated by men individual biographical accounts interspersed with contemporary quotes describe how women overcame the barriers of secondary and tertiary education and of admission to professional societies although these women are lost to historical records they are brought together here for the first time to show that a vibrant culture of female chemists did indeed exist in britain during the late 19th and early 20th centuries contents introduction getting an education the professional societies the london co educational colleges the london women s colleges english provincial universitiesthe cambridge and oxford women s colleges universities in scotland and wales hoppy s biochemical ladies women crystallographers women in pharmacy the role of chemists wives women chemists and the first world war the interwar period and beyond readership historians of science chemists those with an interest in women s studies educationalists and general readers keywords history chemistry science women education university school key features presents the only published account of the lives and contributions of british women chemists from 1880 to 1949 examines the role of certain secondary schools and colleges universities in encouraging women to choose a career in chemistry highlights the role of certain males in championing the women chemists cause and in mentoring individual women discusses the reasons why women clustered in certain fields and the forgotten role of women chemists during the first world war reviews chemistry was their life has been very well researched and is extensively referenced it is of great interest also to read of the battle which these women had to obtain recognition by professional societies chemistry world chemistry was their life is an important contribution to the history of chemistry providing a glimpse into the lives of pioneering british women it has a lot of information about the women who worked in one or another capacity as chemists it is warmly recommended to all chemists chemistry historians and to scientists involved with gender studies structural chemistry

The Jesuits in Poland 1892 this book represents volume one of the writings of david sissons who for most of his career pioneered research on the history of relations between australia and japan much of what he wrote remained unpublished at the time of his death in 2006 and so the editors have included a selection of his hitherto unpublished work along with some of his published writings

breaking japanese diplomatic codes edited by desmond ball and keiko tamura was published in 2013 and forms a part of the series that reproduces many of sissons writings in the current volume the topics covered are wide they range from contacts between the two countries as far back as the early 19th century japanese pearl divers in northern australia japanese prostitutes in australia the wool trade the notorious trade diversion episode of 1936 and a study of the japan historian james murdoch sissons was an extraordinarily meticulous researcher leaving no stone unturned in his search for accuracy and completeness of understanding and should be considered one of australia s major historians his writings deal with not only diplomatic negotiations and decision making but also the lives of ordinary and often nameless people and their engagements with their host society his warm humanity in recording ordinary people s lives as well as his balanced examination of historical incidents and issues from both australian and japanese perspectives are a hallmark of his scholarship
