Something in the Air 2007 the marketplace of revolution offers a boldly innovative interpretation of the mobilization of ordinary Americans on the eve of independence Breen explores how colonists who came from very different ethnic and religious backgrounds managed to overcome difference and create a common cause capable of galvanizing resistance in a richly interdisciplinary narrative that weaves insights into a changing material culture with analysis of popular political protests Breen shows how virtual strangers managed to communicate a sense of trust that effectively united men and women long before they had established a nation of their own the marketplace of revolution argues that the colonists shared experience as consumers in a new imperial economy afforded them the cultural resources that they needed to develop a radical strategy of political protest the consumer boycott never before had a mass political movement organized itself around disruption of the marketplace as Breen demonstrates often through anecdotes about obscure Americans communal rituals of shared sacrifice provided an effective means to educate and energize a dispersed populace the boycott movement the signature of American resistance invited colonists traditionally excluded from formal political processes to voice their opinions about liberty and rights within a revolutionary marketplace an open raucous public forum that defined itself around subscription lists passed door to door voluntary associations street protests destruction of imported British goods and incendiary newspaper exchanges within these exchanges was born a new form of politics in which ordinary men and women precisely the people most often overlooked in traditional accounts of revolution experienced an exhilarating surge of empowerment Breen recreates an empire of goods that transformed everyday life during the mid eighteenth century imported manufactured items flooded into the homes of colonists from New Hampshire to Georgia the marketplace of revolution explains how at a moment of political crisis Americans gave political meaning to the pursuit of happiness and learned how to make goods speak to power

**A Hidden History of the Cuban Revolution** 2004 most americans believe that the ratification of the constitution in 1788 marked the settlement of post revolutionary disputes over the meanings of rights democracy and sovereignty in the new nation in the citizenship revolution douglas bradburn undercuts this view by showing that the union not the nation was the most important product of independence in 1774 everyone in british north america was a subject of king george and parliament in 1776 a number of newly independent states composed of american citizens began cobbling together a union to fight their former fellow countrymen but who was an american what did it mean to be a citizen and not a subject and why did it matter bradburn's stunning reinterpretation requires us to rethink the traditional chronologies and stories of the american revolutionary experience he places battles over the meaning of citizenship in law and in politics at the center of the narrative he shows that the new political community ultimately discovered that it was not really a nation but a union of states and that it was the states that set the boundaries of belonging and the very character of rights for citizens and everyone else to those inclined to believe that the ratification of the constitution assured the importance of national authority and law in the lives of american people the emphasis on the significance and power of the states as the arbiter of american rights and the character of nationhood may seem strange but as bradburn argues state control of the ultimate meaning of american citizenship represented the first stable outcome of the crisis of authority allegiance and identity that had exploded in the american revolution a political settlement delicately reached in the first years of the nineteenth century so ended the first great phase of the american citizenship revolution a continuing struggle to reconcile the promise of revolutionary equality with the pressing and sometimes competing demands of law order and the pursuit of happiness
