the potential worst case devastation that could be caused by a nuclear power plant meltdown as tantamount only to a great world war nothing else has the same impact japan escaped such a dire fate during the fukushima disaster said kan only due to luck even so kan had to make some steely nerved decisions that necessitated putting all emotion aside in a now famous phone call from tepco when the company asked to pull all their personnel from the out of control fukushima site for their own safety kan told them no the workforce must stay the few would need to make the sacrifice to save the many kan knew that abandoning the fukushima daiichi site would cause radiation levels in the surrounding environment to soar his insistence that the tepco workforce remain at fukushima was perhaps one of the most unsung moments of heroism in the whole sorry saga the ecologist on march 11 2011 a massive undersea earthquake off japan s coast triggered devastating tsunami waves that in turn caused meltdowns at three reactors in the fukushima daiichi nuclear power plant ranked with chernobyl as the worst nuclear disaster in history fukushima will have lasting consequences for generations until 3 11 japan s prime minister naoto kan had supported the use of nuclear power his position would undergo a radical change however as kan watched the nuclear disaster at the fukushima no 1 power plant unfold and came to understand the potential for the physical economic and political destruction of japan in my nuclear nightmare kan offers a fascinating day by day account of his actions in the harrowing week after the earthquake struck he

records the anguished decisions he had to make as the scale of destruction became clear and the threat of nuclear catastrophe loomed ever larger decisions made on the basis of information that was often unreliable for example frustrated by the lack of clarity from the executives at tepco the company that owned the power plant kan decided to visit fukushima himself despite the risks so he could talk to the plant s manager and find out what was really happening on the ground as he details a combination of extremely good fortune and hard work just barely prevented a total meltdown of all of fukushima s reactor units which would have necessitated the evacuation of the thirty million residents of the greater tokyo metropolitan area in the book first published in japan in 2012 kan also explains his opposition to nuclear power i came to understand that a nuclear accident carried with it a risk so large that it could lead to the collapse of a country when kan was pressured by the opposition to step down as prime minister in august 2011 he agreed to do so only after legislation had been passed to encourage investments in alternative energy as both a document of crisis management during an almost unimaginable disaster and a cogent argument about the dangers of nuclear power my nuclear nightmare is essential reading

since 1898 the united states and the united nations have deployed military force more than three dozen times in attempts to rebuild failed states currently there are more state building campaigns in progress than at any time in the past century including afghanistan

bosnia kosovo the democratic republic of congo haiti sudan liberia cote d ivoire and lebanon and the number of candidate nations for such campaigns in the future is substantial even with a broad definition of success earlier campaigns failed more than half the time in this book paul d miller brings his decade in the u s military intelligence community and policy worlds to bear on the question of what causes armed international state building campaigns by liberal powers to succeed or fail the united states successfully rebuilt the west german and japanese states after world war ii but failed to build a functioning state in south vietnam after the cold war the united nations oversaw relatively successful campaigns to restore order hold elections and organize post conflict reconstruction in mozambique namibia nicaragua and elsewhere but those successes were overshadowed by catastrophes in angola liberia and somalia the recent effort in iraq and the ongoing one in afghanistan where miller had firsthand military intelligence and policymaking experience are yielding mixed results despite the high levels of resources dedicated and the long duration of the missions there miller outlines different types of state failure analyzes various levels of intervention that liberal states have tried in the state building process and distinguishes among the various failures and successes those efforts have provoked
