for the last two decades the number of political organizations on the far right neo populist right and neo conservative right has been growing along with the mounting electoral success for many of the parties there has also been a growing disenchantment with the political class which has led to a revolt against the current political establishment the events of september 11 2001 and the war on terror have further aggravated tensions within the populations between those who feel they are the legitimate citizens of the state and those who are considered outsiders the recent expansion of the eu s borders has also brought on fears of a surge of both legal and illegal immigration all these factors have led to a growing number of cases of harassment and outbursts of violence aimed at asylum seekers and ethnic minorities in europe this book measures the effects of neo populist groups on the current political establishment and illustrates how much political appeal neo populist views have on making current political policy moving with the magdalen is the first art historical book dedicated to the cult of mary magdalen in the late medieval alps its seven case study chapters focus on the artworks commissioned for key churches that belonged to both parish and pilgrimage networks in order to explore the role of artistic workshops commissioning patrons and diverse devotees in the development and transfer of the saint s iconography across the mountain range together they underscore how the magdalen s cult and contingent imagery interacted with the environmental conditions and landscape of the alps along late medieval routes an account of the astrological controversies that arose in renaissance italy in the wake of giovanni pico della mirandola s disputationes adversus astrologiam divinatricem published in 1496 l idea costruita è il manifesto teorico di alberto campo baeza una raccolta di testi di varia provenienza che manifesta la chiarezza del suo pensiero e la straordinaria coerenza della sua opera concentrandosi sui fondamenti della disciplina la luce il confronto con la gravità il valore delle idee il flusso incessante della storia l autore redige un testo colto ma volontariamente antiaccademico aperto alle suggestioni delle altre discipline artistiche ma con una evidente passione didattica i testi sui grandi maestri dell architettura spagnola fisac de la sota sáenz de oíza coderch carvajal mondiale mies van der rohe utzon o sui colleghi della scena internazionale ando chipperfield llinás vicens e ramos mettono in luce il suo percorso culturale e la sua idea di architettura basata sul suo rigoroso más con menos la storia dell architettura lungi dall essere solo una storia delle forme è fundamentalmente una storia delle idee costruite le forme si disgregano col tempo ma le idee rimangono sono eterne un architettura che ha nell idea la sua origine nella luce il suo primo materiale nello spazio essenziale la volontà di ottenere il più con meno this book examines the political connections and trade relations between italy and china with particular emphasis on the second half of the 19th century and the period following the second world war in recent years economic relations between the two countries have intensified as a result of increasing exchange and trade agreements with positive impacts on their political and diplomatic relations by studying original public sources such as the archives of the italian ministry of foreign affairs the bank of italy and the central state archives in rome the author offers a historical perspective on the evolution of the two countries economic and political ties the respective chapters address e g the role of international governmental authorities the role of the italian bank of china the impact of trade agreements and foreign investment projects etc given its scope the book will appeal to scholars of economic history and international economics as well as political scientists and legal scholars with an interest in international diplomacy and trade agreements on march 24 1944 nazi occupation forces in rome killed 335 unarmed civilians in retaliation for a partisan attack the day before portelli has crafted an eloquent multi voiced oral history of the massacre of its background and its aftermath the moving stories of the victims the women and children who survived and carried on the partisans who fought the nazis and the common people who lived through the tragedies of the war together paint a many hued portrait of one of the world s most richly

carried out powerfully relates the struggles for freedom under fascism and nazism the battles for memory in post war democracy and the meanings of death and grief in modern society this book examines property legislation and the actual position of women in receiving holding and passing on family property as daughters wives and as widows throughout history traditionally the prevailing view has been that women have been disadvantaged in the distribution of property and therefore less interesting as objects of study this volume challenges this view and explores the securing of property for families or for individuals through transfers in the shape of dowries marriage contracts wills and other arrangements as well as how women used and distributed the property they were holding the scope of the volume is both urban and rural analysing the position of women in relation to family property through contributions from a wide geographic area the chapters investigate the situation in southern and northern europe across the atlantic and africa throughout the 18th to the 20th century this volume will be of value to academics undergraduates postgraduates and scholars interested in gender and history and social history during the 1920s and 1930s mussolini s fascist regime attempted to promote fascist italy s national project in argentina bombarding the republic with its propaganda although politically a failure this propaganda provoked a debate over the idea of a national identity outside of the nation state and the potential roles that citizens living abroad could play in their country of origin in propagating an italian national identity within another sovereign state mussolini s initiative also inspired heated debate among native argentinians over their own national project as a nation of immigrants using the experiences of mussolini s efforts in argentina as its case study this book demonstrates how national projects take on different meanings once they enter a contested public space it details how both members of the italian community as well as native argentinians reshaped italy s national discourse from abroad by entangling it with argentina s own national project in exploring the way in which nations are imagined constructed and recast both from above as well as from below mussolini s national project in argentina offers new perspectives on the politics of identity formation while providing a transatlantic example of the dynamic interplay between the italian state and its emigrant communities it is in short a transnational perspective on what it means to belong to a nation over the course of the 20th century the rapid transformation of italy from an impoverished predominantly agricultural nation to one of the strongest economies in the world forged a fascinating and contradictory society where gender relations were a particular mix of modernity and tradition in this accessible and innovative study perry willson provides a nuanced and insightful analysis of the impact of social political economic and cultural developments on italian women s lives she also explores how women were affected by and how they themselves helped shape key historical events such as the rise of fascism the 2 world wars the economic miracle of the post war years and the cultural and political upheavals of the 1970s women in twentieth century italy is the first book length overview of italian women s experience during this period of intense and dramatic change drawing on the latest historiography in the field and written in a lively and engaging manner it is essential reading for anyone with an interest in italy s recent past an award winning historian s revisionary account of the early modern world showing how apocalyptic this book explores the in depth relationship between historic cultural heritage and landscape urban and regional planning it analyzes recent cultural and discipline positions and addresses research to interpret legacy values and the necessity for conservation within the urban setting it also presents a method that helps urban planners to implement the suggestions based on extensive knowledge of topographic methods and urban archaeology to enhance the shaping and planning of the historic and present day city a rapid evolution of techniques and methods that provide innovative planning instruments and contribute to conservation projects involving cities and territories is now being witnessed in urban planning actors involved in the planning process use an organic and multidisciplinary vision of techniques and methods to understand the relation between the historic cultural goods and their settlement context through urban archaeology it is now possible to orient in a systematic way interventions in the historic centers of european cities and document the origin and evolution of the urban shape to reconcile renewal demand and preservation of ancient heritage peasant women were the largest female occupational group in italy between the wars they led lives characterised by great poverty and heavy workloads but fascist propaganda extolled them as the mothers of the nation and the guardians of the rural worlds the most praiseworthy of italian women this study is the first published history of the massaie rurali the fascist party s section for peasant women which with three million members by 1943 became one of the largest of the regime s mass mobilizing organizations the section played a key role in such core fascist campaigns as nation building and ruralization perry willson draws on a wide range of archival and contemporary press sources to investigate the nature of the massaie rurali and the dynamics of class and gender that lay at its heart she explores the organization s political message its propaganda and the reasons why so many women joined it from the second half of the 1940s when postwar reconstruction began in italy there were three notable driving forces of environmental change the uncontrollable process of urban drift fueled by considerable migratory flows from the countryside and southern regions toward the cities where large scale productive activities were beginning to amass unruly industrial development which was tolerated since it was seen as the necessary tribute to be paid to progress and modernization and mass consumption in his fourth book federico paolini presents a series of essays ranging from the uses of natural resources to environmental problems caused by means of transport to issues concerning environmental politics and the dynamics of the environment movement paolini concludes the book with a forecast about the environmental problems that will emerge in the public debate of the twenty first century the field of urban environmental history is a relatively new one yet it is rapidly moving to the forefront of scholarly research and is the focus of much interdisciplinary work given the environmental problems facing the modern world it is perhaps unsurprising that historians geographers political natural and social scientists should increasingly look at the environmental problems faced by previous generations and how they were regarded and responded to this volume reflects this growing concern and reflects many of the key concerns and issues that are essential to our understanding of the problems faced by cities in the nineteenth and twentieth centuries addressing a variety of environmental issues such as clean water supply the provision retention of green space and noise pollution that faced european and north american cities the essays in this volume highlight the common responses as well as the differences that characterised the reactions to these trans national concerns current economic theories do not provide the elements to understand the causes and processes that provoke economic crises in this book maurizio pasquino explains the underlying identifying and resolving the problems of the society in which we live today oral history an interdisciplinary anthology is a collection of classic articles by some of the best known proponents of oral history demonstrating the basics of oral history while also acting as a guidebook for how to use it in research added to this new edition is insight into how oral history is practiced on an international scale making this book an indispensable resource for scholars of history and social sciences as well as those interested in oral history on the avocational level this volume is a reprint of the 1984 edition with the added bonus of a new introduction by david dunaway and a new section on how oral history is practiced on an international scale selections from the original volume trace the origins of oral history in the united states provide insights on methodology and interpretation and review the various approaches to oral history used by folklorists historians anthropologists and librarians among others family and ethnic historians will find chapters addressing the applications of oral history in those fields a major review of all of the many strands of gramsci interpretation from the earliest writings of his contemporaries through to the academic debates of the 2010s this is the first in depth study of the feminist movement that swept italy during the long 1970s 1968 1983 and one of the first to use a combination of oral history interviews and newly released archive sources to analyze the origins themes practices and impacts of second wave feminism while detailing the local and national contexts in which the movement operated it sees this movement as transnationally connected emerging in a society that was both characterized by traditional gender roles and a microcosm of radical political projects in the wake of 1968 the feminist movement was able to transform the lives of thousands of women shape gender identities and roles and provoke political and legislative change more strongly mass based and socially diverse than its counterparts in other western countries at the time its agenda encompassed questions of work unpaid care work sexuality health reproductive rights sexual violence social justice and self expression the case studies detailing feminist politics in three cities turin naples and rome are framed in a wider analysis of the movement s emergence its transnational links and local specificities and its practices and discourses the book concludes on a series of hypotheses regarding the movement s longer term impacts and trajectories taking it up to the berlusconi era and the present day this volume brings together for the first time a series of studies on the social history of venereal disease in modern europe and its former colonies it explores from a comparative perspective the responses of legal medical and political authorities to the great scourge in particular how such responses reflected and shaped social attitudes towards sexuality and social relationships of class gender generation and race offering historical identity fortified by the presence of women belonging to the various areas of creative and intellectual life this book allows readers to understand greater contexts of their identity the history of female artists is an indicator of how social identity was erased from the historiography which asserted itself in nineteenth century europe analysis of the biographical pathways traced here reveals how women in the middle ages and beyond have been active protagonists of the arts received reviews as well as had an authoritative role as the esteemed and attentive witnesses of the society around them reconstruction of social relationships intellectual and creative production as well as of the life stories of some of europe s most important female artists foregrounds this omission and highlights their extraordinary nature the different stories contained in this book narrate the lives and works of hildegard von bingen francesca caccini mary wollstonecraft george sand lou andreas salomé and elke mascha blankenburg by reinforcing the awareness of social and historical origins the informed reader is better equipped to tackle their futures and build up their personalities this innovative new book is overtly and explicitly about female agency in eighteenth century european towns however it positions female activity and decisions unequivocally in an urban world of institutions laws regulations customs and ideologies gender politics complicated and shaped the day to day experiences of working women town rules and customs as well as police and guilds regulations affected women s participation in the urban economy most of the time the formally recognized and legally accepted power of women which is an essential component of female agency was very limited yet these chapters draw attention to how women navigated these gendered terrains as the book demonstrates exclusion is too strong a word for the realities and pragmatism of women s everyday lives frequently guild and corporate regulations were more about situating women and regulating their activities as than

than preventing them from operating in the urban economy similarly corporate structures which were under stress found flexible strategies to incorporate women who through their own initiative and activities put pressure on the systems women could benefit from the contradictions between moral and social unwritten norms and economic regulations and could take advantage of the tolerance or complicity of urban authorities towards illicit practices women with a grasp of their rights and privileges could defend themselves and exploit legal systems with its loopholes and contradictions to achieve economic independence and power this book offers a comparative perspective on northern and southern european laws and customs concerning women s property and economic rights by focusing on both northern and southern european societies these studies analyse the consequences of different juridical frameworks and norms on the development of the economic roles of men and women this volume is divided into three parts the first laws presents general outlines related to some european regions the second family strategies or marital economies questions the potential conflict between the economic interests of the married couple and those of the lineage within the nobility finally the third part of the book inside the urban economy focuses on economic and work activities of middle and lower classes in the urban environment the assorted and rich panorama offered by the history of the legislation on women s economic rights shows that similarities and differences run through europe in such a way that the north south model looks very stereotyped while this approach calls into question classical geographical and cultural maps and well established chronologies it encourages a reconsideration of european history according to a cross boundaries perspective by drawing on a wide range of social economic and cultural european contexts from the late medieval to early modern age to the nineteenth century and including the middle and lower classes especially artisans merchants and traders as well as the economic practices and norms of the upper middle class and aristocracy this book will be of interest to economic and social historians sociologists of health gender and sexuality and economists learn italian as you read and hear about the vibrant culture of its speakers read think italian is an innovative non intimidating approach to learning italian compiled by the expert editors of think italian magazine this audio package brings together more than 100 engaging fully illustrated readings and articles about the life and culture of italy the 70 minute audio cd features many of the articles read aloud by native speakers as well as questions for review and reinforcement of new vocabulary this collection offers a variety of approaches to aspects of women s lives it moves beyond men s prescriptive pronouncements about female nature to women s lived experiences replacing the singular woman with plural women and illuminating female agency the contributors show that women s lives changed over the life course and differed according to region and social class they also demonstrate that in the early modern period the largely private spaces in women s lives were not enclosed worlds isolated from the public spaces in which men operated contributors to this important collection are leading international scholars and offer strong substantial and archival based research in naples and napoleon john davis takes the southern italian kingdom of the two sicilies as the vantage point for a sweeping reconsideration of italy s history in the age of napoleon and the european revolutions the book s central themes are posed by the period of french rule from 1806 to 1815 when southern italy was the mediterranean frontier of napoleon s continental empire the tensions between naples and paris made this an important chapter in the history of that empire and revealed the deeper contradictions on which it was founded but the brief interlude of napoleonic rule later came to be seen as the critical moment when a modernizing north finally parted company from a backward south although these arguments still shape the ways in which italian history is written in most parts of the north political and economic change before unification was slow and gradual whereas in the south it came sooner and in more disruptive forms davis develops a wide ranging critical reassessment of the dynamics of political change in the century before unification his starting point is the crisis that overwhelmed the italian states at the end of the 18th century when italian rulers saw the political and economic fabric of the ancien régime undermined throughout europe in the south the crisis was especially far reaching and this davis argues was the reason why in the following decade the south became the theatre for one of the most ambitious reform projects in napoleonic europe the transition was precarious and insecure but also mobilized political projects and forms of collective action that had no counterparts elsewhere in italy before 1848 illustrating the similar nature of the

political challenges facing all the pre unification states although unification finally brought italy s insecure dynastic principalities to an end it offered no remedies to the insecurities that from much earlier had made the south especially vulnerable to the challenges of the new age which was why the south would become a problem italy s southern problem

this innovative new book is overtly and explicitly about female agency in eighteenth century european towns however it positions female activity and decisions unequivocally in an urban world of institutions laws regulations customs and ideologies gender politics complicated and shaped the day to day experiences of working women town rules and customs as well as police and guilds regulations affected women s participation in the urban economy most of the time the formally recognized and legally accepted power of women which is an essential component of female agency was very limited yet these chapters draw attention to how women navigated these gendered terrains as the book demonstrates exclusion is too strong a word for the realities and pragmatism of women s everyday lives frequently guild and corporate regulations were more about situating women and regulating their activities rather than preventing them from operating in the urban economy similarly corporate structures which were under stress found flexible strategies to incorporate women who through their own initiative and activities put pressure on the systems women could benefit

from the contradictions between moral and social unwritten norms and economic regulations and could take advantage of the tolerance or complicity of urban authorities towards illicit practices women with a grasp of their rights and privileges could defend themselves and exploit legal systems with its loopholes and contradictions to achieve economic independence and power

in naples and napoleon john davis takes the southern italian kingdom of the two sicilies as the vantage point for a sweeping reconsideration of italy s history in the age of napoleon and the european revolutions the book s central themes are posed by the period of french rule from 1806 to 1815 when southern italy was the mediterranean frontier of napoleon s continental empire the tensions between naples and paris made this an important chapter in the history of that empire and revealed the deeper contradictions on which it was founded but the brief interlude of napoleonic rule later came to be seen as the critical moment when a modernizing north finally parted company from a backward south although these arguments still shape the ways in which italian history is written in most parts of the north political and economic change before unification was slow and gradual whereas in the south it came sooner and in more disruptive forms davis develops a wide ranging critical reassessment of the dynamics of political change in the century before unification his starting point is the crisis that overwhelmed the italian states at the end of the 18th century when italian rulers saw the political and economic fabric of the ancien régime undermined throughout europe in the south the crisis was especially far reaching and this davis argues was the reason why in the following decade the south became the theatre for one of the most ambitious reform projects in napoleonic europe the transition was precarious and insecure but also mobilized political projects and forms of collective action that had no counterparts elsewhere in italy before 1848 illustrating the similar nature of the political challenges facing all the pre unification states although unification finally brought italy s insecure dynastic principalities to an end it offered no remedies to the insecurities that from much earlier had made the south especially vulnerable to the challenges of the new age which was why the south would become a problem italy s southern problem
