from the day i picked up my first two hives back in 1964 i have been asked questions about honey bees some questions were asked by folks who were just curious about bees and other questions were asked by folks who had an interest in getting into beekeeping themselves even my scout master couldnt resist asking me questions about beekeeping when i was taking my beekeeping merit badge exam which unfortunately the boy scouts don t offer any longer my scout master was so fascinated about all the beekeeping equipment and my presentation that he got into beekeeping himself there is so much to learn about beekeeping i could spend another lifetime studying beekeeping and never be able to learn all of it my bees amaze me every day with something new that is what keeps beekeeping so interesting to me i wanted to write this book so that you could learn from all my years of experience and not have to re invent the wheel i have assembled a vast number of questions and answers for you since all of the questions and answers in this book are in no special order i have provided you with an index in the back of the book for your convenience these questions are real questions from folks who have emailed me on the lone star farms website and from folks who contacted me with questions about beekeeping throughout the years there is rarely just one answer to a beekeeping question especially among beekeepers but i have answered the questions with the answers that have always worked best for me over the years i do hope that you enjoy reading my book and that you are able to use my book as a reference guide for your beekeeping endeavor for as long as you keep bees dennis brown

this historic book may have numerous typos and missing text purchasers can usually download a free scanned copy of the original book without typos from the publisher not indexed not illustrated 1917 edition excerpt on beekeeping q what are the laws governing the keeping of bees disease control etc a laws concerning bees and diseases are made by each state individually write to your state bee inspector or state entomologist for information if you do not know who he is the publishers of the bee journals should be able to inform you laying workers q in overhauling a friend s bees today i had a new experience i found a colony that was queenless at least no queen was noticed and no brood was found in any of the combs excepting a small quantity of drone brood sealed up ninety six drone cells actual count and one sealed queen cell no worker brood at all the queen cell was right among the sealed drone cells a it is not only possible but probable that not only a laying worker but a number of them were present and that the bees attempted to rear a queen just as you have suggested q in appearance are laying workers different from workers a not a bit i suppose i have seen hundreds of them for in every colony with laying workers it isn t a single worker but a whole nest of them at the miserable business but i never could tell which the laying workers were except one single laying worker that i caught in the act of laying q do old bees become drone layers or do only the younger ones go astray a i have a strong impression it s only the younger ones some have advanced the theory that laying workers in their larval existence have been located near queen cells and so have been fed some of the royal jelly as a sort of overflow if that were the true theory of course there would be no drone layers except those which started in at the business early in life but i wouldn t take much
