continuing the narrative from volume one of from bharata to india this second volume spans the years from the muslim conquests down to the present era the volume begins by contrasting the stifling theocracy of the abrahamic religions judaism and christianity and of islam to the pristine ideation of compassion love and universal wellbeing inherent in the vedic world the forced conversion of pagan peoples and their places of worship was consequently institutionalized by intolerance savagery barbarism cruelty and unparalleled brutality this cultural and religious invasion shook the very foundations of the vedic patrimony as the native hindus adapted alien lifestyles where vedic values were repackaged as european and or islamic consequently the modern indians began to despise what had once been their own legacy the cradle of civilization and embraced imported modes of behavior the transformed native polity supported by foreign vested interests exploited their own country even more than the alien invaders as the western world frees itself from the shackles of middle age conformism and depravity this second volume concludes that the eternal values of vedic bharata are to inspire the nascent civilization of tomorrow eastern introspection will replace then the western tradition of a wholly other divinity

it was in late 2002 that the idea of preparing a collection of multi authored chapters on different aspects of agroforestry as a compendium for the 1 world congress of agroforestry june 2004 was tossed around with the approval of the idea by the congress organizing committee serious efforts to make it a reality got under way in early 2003 the rigorously peer reviewed and edited manuscripts were submitted to the publisher in december 2003 considering the many different individuals involved in the task as authors and manuscript reviewers we feel quite pleased that the task could be accomplished within this timeframe we are pleased also about the contents on several counts first of all the tropical temperate mix of topics is a rare feature of a publication of this nature in spite of the scientific commonalities between tropical and temperate practices of agroforestry the differences between them are so enormous that it is often impossible to mesh them together in one publication secondly several of the chapters are on topics that have not been discussed or described much in agroforestry literature a third feature is that some of the authors though well known in their own disciplinary areas are somewhat new to agroforestry the perceptions and outlooks of these scholars who are relatively uninfluenced by the past happenings in agroforestry gives a whole new dimension to agroforestry and broadens the scope of the subject finally rather than just reviewing and summarizing past work most chapters take the extra effort in attempting to outline the next steps
