Stem Cells and Signaling Pathways

2023-10-11

stem cells and signaling pathways provides mechanistic insights into the role of stem cells to combat the covid 19 outbreak and other pathologies where a cytokine storm is the cause of concern for e g radiation exposure multiple organ failure and sepsis the advent of sars cov 2 resulted in a global pandemic putting individuals with other comorbidities at a higher risk of infection the whole world witnessed a massive shortage of medical and other essential supplies needed to combat the virus that said stem cell therapy has emerged as a potential treatment for viral diseases including but not limited to covid 19 interestingly the clinical trials in the patients having covid 19 complications depicted faster recovery in patients post mesenchymal stem cells therapy owing to the decreased cytokines levels anti viral effects and regeneration of the infected tissue evaluates the role of mscs to combat cytokine storm the challenges regarding covid 19 therapy and how they can be countered with the use of stem cells and the risk of opportunistic infections post covid 19 presents how stem cell therapy has emerged as a potential treatment for viral diseases including but not limited to covid 19 provides a detailed understanding of the novel coronavirus with an emphasis on the therapeutic aspects

Small Spacecraft Development Project-Based Learning

2017-02-07

this book provides the information that is required to start a small spacecraft program for educational purposes this will include a discussion of multiple approaches to program formation and build buy hybrid decision considerations the book also discusses how a cubesat or other small spacecraft program can be integrated into course and or program curriculum and the ancillary benefits that such a program can provide the assessment of small spacecraft programs and participatory project based learning programs is also discussed extensively the book presents prior work related to program assessment both for a single program and internationally and discusses how similar techniques can be utilized for both formative and summative assessment of a new program the utility of these metrics and past assessment of other programs in gaining buy in for program formation and funding is also considered

Introduction to PCM Telemetry Systems

2017-09-19

introduction to pcm telemetry systems third edition summarizes the techniques and terminology used in sending data and control information between users and the instruments that collect and process the data fully revised it gives an overall systems introduction to the relevant topics in three primary areas system interfaces data transport timing and synchronization and data transmission techniques integrating relevant information about the process at all levels from the user interface down to the transmission channel this will also include how designers apply relevant industry and government standards at each level in this process homework problems are included at the end of each chapter

Handbook of Tumor Syndromes

2020-05-08

tumors cancers are characterized by uncontrolled growths of abnormal cells that extend beyond their usual boundaries and disrupt the normal functions of affected organs and systems while about 75 80 of tumors cancers arise sporadically without a family connection 20 25 appear to be familial including 10 15 nonhereditary familial tumors or familial tumors and 5 10 hereditary familial tumors or hereditary tumors as nonhereditary and hereditary familial tumors often show both tumor related and non tumor related or syndromic symptoms they are referred to as tumor syndromes or cancer susceptibility syndromes in comparison with sporadic tumors cancers tumor syndromes 300 described so far tend to occur at a younger age involve multiple organs and systems produce multiple often in a distinct spectrum and bilateral lesions form multiple hamartomatous benign or precursor lesions locate in specific site s display unique syndromic features and affect multiple members generations of a family this book provides state of art and authoritative coverage of nearly 100 tumor syndromes with chapters presenting overviews of individual tumor syndromes in relation to their biology epidemiology pathogenesis clinical features diagnosis treatment and prognosis featuring contributions from oncologists clinicians and specialists the book offers a reliable comprehensive reference on tumor syndromes for scholars and students of medicine dentistry pharmacology nursing public health and other biomedical disciplines key features reviews the biology epidemiology pathogenesis and clinical features of tumor syndromes contains up to date information on the diagnosis and treatment of tumor syndromes includes expert coverage from leading oncologists and clinicians related titles j r mcintosh understanding cancer an introduction to the biology medicine and societal implications of this disease isbn 978 0 8153 4535 0 p s t shanmugam understanding cancer therapies isbn 978 1 1381 9815 9 j m baehring and j m piepmeier eds brain tumors practical guide to diagnosis and treatment isbn 978 0 3673 9022 8 d liu tumors and cancers endocrine glands blood marrow lymph isbn 978 1 4987 2975 8 dongyou liu phd has worked at several research and clinical laboratories in australia and the united states for the past three decades with a focus on molecular characterization of microbial pathogens and

Like a Waking Dream

2012-11-20

prior to his thirty year career in the first ever academic buddhist studies program in the united states geshe sopa was the son of peasant farmers a novice monk in a rural monastery a virtuoso scholar monk at one of the prestigious central monasteries in lhasa and a survivor of the tibetan uprising and perilous flight into exile in 1959 in like a waking dream geshe sopa frankly and observantly reflects on how his life in tibet a monastic life of yogic simplicity shaped and prepared him for the unexpected the account of his years in tibet preserves as well valuable insight and details about a now vanished era of tibetan religious culture his is a tale of an exemplary life dedicated to learning spiritual cultivation and the service of others from one of the greatest living masters of tibetan buddhism

The Making of the German Post-War Economy

2010-02-28

the years following the end of world war ii in germany were a significant period of change and upheaval this book on the economic reconstruction of post war west germany traces the development of economic and socio political ideas and their gradual absorption by mainstream politicians officials and the general public during the period of transition between 1945 and 1949 in the aftermath of world war ii several german think tanks political parties and individuals gave impulse to and then shaped the development of a viable socio political and economic model between the extremes of laissez faire capitalism and the collectivist planned economy in their endeavours to bring into effect their particular economic ideas often diametrically opposed to one another the parties of left and right stimulated not only academic and political debate but also public debate about the political and economic reconstruction of occupied post war germany while all the various neo liberal approaches assigned to the people sovereign and decisive status in the institutional economic order and recognised the interdependence of politics economics and the public one particular school of economic thought outpaced the others in communicating a model of coordinated economic and social policy namely the social market economy christian glossner here investigates whether or not it was primarily the subtlety of the political campaign for this model that led to its implementation by the then economic council and eventual validation by the german electorate the programmes published by the principal academic and political groups of the time and the practical day to day decisions of the first parliament in post war germany are analysed with reference to popular preferences by examining both the formative involvement of german parties in post war reconstruction and the role of the public during the process of economic liberalisation this book provides explanations for why the social market economy prevailed as the socio political and economic model for the federal republic of germany it will be of interest to scholars of german economic and twentieth century history

Proceedings of the 12th Reinventing Space Conference

2016-12-25

the proceedings of the 2014 reinventing space conference present a number of questions in the context of a constantly innovating space industry from addressing the future of global cooperation investigating the impact of cuts in us government spending on the private space sector and probing the overall future of the commercial launch sector space tourism and new technology promise the revival of interest in space development the apollo era was the first period of intense space activity and growth the need to create dramatically lower cost responsive and reliable launch systems and spacecraft has never been more vital advances in technology are allowing smaller and cheaper satellites to be orbited from cubesats to nanosatellites to femtosatellites thanks to more efficient new launch possibilities low cost access to space is becoming ever more achievable commercial companies and countries are targeting the industry with new funding organised by the british interplanetary society the presentations at this conference thoroughly address these challenges and opportunities

Chemical Physics of Molecular Condensed Matter

2020-10-09

this book fills a gap in knowledge between chemistry and physics trained researchers about the

properties of macroscopic bulk material although many good textbooks are available on solid state or condensed matter physics they generally treat simple systems such as simple metals and crystals consisting of atoms on the other hand textbooks on solid state chemistry often avoid descriptions of theoretical background even at the simplest level this book gives coherent descriptions from intermolecular interaction up to properties of condensed matter ranging from isotropic liquids to molecular crystals by omitting details of specific systems for which comprehensive monographs are available on liquid crystals and molecular conductors for instance this book highlights the effects of molecular properties i e the presence of the shape and its deformation on the structure and properties of molecular systems

Glimpses of Tibetan Divination

2019-11-04

glimpses of tibetan divination past and present is the first book of its kind in that it contains articles by a group of eminent scholars who approach the subject matter by investigating it through various facets and salient historical figures
