scientists use concepts and principles that are partly specific for their subject matter but they also share part of them with colleagues working in different fields compare the biological notion of a natural kind with the general notion of confirmation of a hypothesis by certain evidence or compare the physical principle of the conservation of energy and the general principle of the unity of science scientists agree that all such notions and principles aren t as crystal clear as one might wish an important task of the philosophy of the special sciences such as philosophy of physics of biology and of economics to mention only a few of the many flourishing examples is the clarification of such subject specific concepts and principles similarly an important task of general philosophy of science is the clarification of concepts like confirmation and principles like the unity of science it is evident that clarification of concepts and principles only makes sense if one tries to do justice as much as possible to the actual use of these notions by scientists without however following this use slavishly that is occasionally a philosopher may have good reasons for suggesting to scientists that they should adhere to standards more process mining techniques in business environments theoretical aspects algorithms techniques and open challenges in process mining lecture notes in business information processing

frequently this amounts to a plea for differentiation in order to stop debates at cross purposes due to the conflation of different meanings while the special volumes of the series of handbooks of the philosophy of science address topics relative to a specific discipline this general volume deals with focal issues of a general nature after an editorial introduction about the dominant method of clarifying concepts and principles in philosophy of science called explication the first five chapters deal with the following subjects laws theories and research programs as units of empirical knowledge theo kuipers various past and contemporary perspectives on explanation stathis psillos the evaluation of theories in terms of their virtues ilkka niiniluoto and the role of experiments in the natural sciences notably physics and biology allan franklin and their role in the social sciences notably economics wenceslao gonzalez in the subsequent three chapters there is even more attention to various positions and methods that philosophers of science and scientists may favor ontological epistemological and methodological positions james ladyman reduction integration and the unity of science as aims in the sciences and the humanities william bechtel and andrew hamilton and logical historical and computational approaches to the philosophy of science atocha aliseda and donald gillies the volume concludes with the much debated question of demarcating science from nonscience martin mahner and the rich european american history of the philosophy of science in the 20th century friedrich stadler comprehensive coverage of the philosophy of science written by leading philosophers in this field clear style of writing for an interdisciplinary audience no specific pre knowledge required

Cumulated Index Medicus 1991

the forest plantations in the biltmore estate near biltmore and asheville n c represent one of the earliest large scale reforestation projects under private initiative in this country planting and seed sowing operations were begun there about 40 years ago in 1890 and the work was continued until about 1911 the resulting stands present an excellent opportunity to study the success or failure of forest planting with a large number of species in this part of the southern appalachian region

The Chicago Blue Book of Selected Names of Chicago and Suburban Towns 1890

atlanta and environs is in every way an exhaustive history of the atlanta area from the time of its settlement in the 1820s through the 1970s volumes i and ii together more than two thousand pages in length represent a quarter century of research by their author franklin m garrett a man called a walking encyclopedia on atlanta history by the atlanta journal constitution with the publication of volume iii by harold h martin this chronicle of the south s most vibrant city incorporates the spectacular growth and enterprise that have characterized atlanta in recent decades the work is arranged chronologically with a section devoted to each decade a chapter to each year volume i covers the history of atlanta and its people up to 1880 ranging from the city s founding as terminus through its civil war destruction and subsequent phoenixlike rebirth volume ii details atlanta s development from 1880 through the 1930s including occurrences of such diversity as the development of the coca cola company and the atlanta premiere of gone with the wind taking up the city s fortunes in the 1940s volume iii spans the years of atlanta s greatest growth tracing the rise of new building on the downtown skyline and the construction of hartsfield international airport on the city s perimeter covering the politics at city hall and the box scores of atlanta s new baseball team recounting the changing terms of race relations and the city s growing support of the arts the last volume of atlanta and environs documents the maturation of the south s preeminent city
