will a one child policy increase economic growth does globalization contribute to global warming are unequal societies less healthy than more egalitarian societies to answer questions like these social scientists turn to quantitative macro comparative research qmcr although many social scientists understand statistics conceptually they struggle with the mathematical skills required to conduct qmcr in methods for quantitative macro comparative research author salvatore j babones offers a means to bridge that gap interpreting the advanced statistics used in qmcr in terms of verbal descriptions that any college graduate with a basic background in statistics can follow he addresses both the philosophical foundations and day to day practice of qmcr in an effort to improve research outcomes and ensure policy relevance a comprehensive guide to qmcr the book presents an overview of the questions that can be answered using qmcr details the steps of the research process and concludes with important guidelines and best practices for conducting qmcr the book assumes that the reader has a sound grasp of the fundamentals of linear regression modeling but no advanced mathematical knowledge is required in order for researchers and students to read understand and enjoy the book a conversational discussion style supplemented by 75 tables and figures makes the book's methodological arguments accessible to both students and professionals extensive citations refer readers back to primary discussions in the literature and a comprehensive index provides easy access to coverage of specific techniques this should be required reading for world bank oecd and u n researchers and data collectors as well as applied and academic sociologists economists political scientists and others who conduct cross country comparisons using publicly available large datasets ernesto castañeda university of texas at el paso i really don't know how the author has managed it but he covers complex material in an incredibly clear way i think students who have a weaker background in statistics will learn a lot from the text and students with an advanced background in statistics will look at their analyses in a different way from the point of planning analyses to actually interpreting results lesley williams reid georgia state university first multi year cumulation covers six politics in anthropology and charts new analytical approaches to examining islam in the post 9 11 world challenges current and past approaches to the study of islam and muslim politics in anthropology offers a critical comprehensive review of past and current literature on the subject presents innovative ethnographic description and analysis of everyday muslim politics in asia africa the middle east and north america proposes new analytical approaches to the study of islam and muslim politics corruption is once again high on the international policy agenda as a result of globalization the spread of democracy and major scandals and reform initiatives but the concept itself has been a focus for social scientists for many years and new findings and data take on richer meanings when viewed in the context of long term developments and enduring conceptual debates this compendium a much enriched version of a work that has been a standard reference in the field since 1970 offers concepts cases and fresh evidence for comparative analysis building on a nucleus of classic studies laying out the nature and development of the concept of corruption the book also incorporates recent work on economic cultural and linguistic dimensions of the problem as well as critical analyses of several approaches to reform while many authors are political scientists work by historians economists and sociologists are strongly represented two thirds of the nearly fifty articles are based either on studies especially written or translated for this volume or on selected journal literature published in the 1990s the tendency to treat corruption as merely a synonym for bribery is illuminated by analyses of the diverse terminology and linguistic techniques that help distinguish corruption problems in the major languages recent attempts to measure corruption and to analyze its causes and effects quantitatively are also critically examined new contributions emphasize especially corruption phenomena in asia and africa contrasts among region and regime types comparing u s state corruption incidence european party finance and corruption assessments of international corruption rating the 19th international conference on computational science and its applications iccsa 2019 held in saint petersburg russia in july 2019 the 64 full papers 10 short papers and 259 workshop papers presented were carefully reviewed and selected from numerous submissions the 64 full papers are organized in the following five general tracks computational methods algorithms and scientific applications high performance computing and networks geometric modeling graphics and visualization advanced and emerging applications and information systems and technologies the 259 workshop papers were presented at 33 workshops in various areas of computational sciences ranging from computational science technologies to specific areas of computational sciences such as software engineering security artificial intelligence and blockchain technologies a state of the art comprehensive exposition of combining qualitative comparative analysis qca and case studies this book facilitates the efficient use and independent learning of this form of smmr set theoretic multi method research with the best available software it will reduce the time and effort required when performing both qca and case studies within the same research project this is achieved by spelling out the conceptual principles and practices in smmr and by introducing a tailor made r software package with an applied and practical focus this is an intuitive resource for implementing the most complete protocol of smmr features include learning goals core points and empirical examples as well as boxed examples of r codes and the r output it produces there is also a glossary for key smmr terms additional online material is available comprising machine readable datasets and r scripts for replication and independent learning since the publication of the first edition of head strong how psychology is revolutionizing war in 2014 developments in military psychology have been rapid and important so much so that this revised edition is necessary to accurately capture the vital role that psychology continues to play in 21st century military success the ideas contained in the first edition influenced emerging doctrine in the army s human dimension and informed military leaders around the globe of ways that psychological science and practice may be leveraged to improve combat effectiveness many of the predictions made in the first edition have come true and new and exciting products of military psychology now offer novel ways of impacting military outcomes this revised edition of head strong updates the 13 chapters included in the first edition with breaking news in military psychology and adds new material to augment those chapters two entirely new chapters are included in this edition the first is on character and discusses how to measure it how to develop it and how character plays a vital role in the performance of individual soldiers and their units the second new chapter is based on a year long special assignment the author spent working as a fellow for the army chief of staff s strategic studies group and captures the rapid developments in psychology cognitive neuroscience and other disciplines that may help the military optimize soldier and unit performance like the other topics in head strong these two new chapters have significant applicability to non military organizations including schools corporations and sports teams taken together the updates and new chapters make head strong revised edition essential reading for anyone interested in how the military and by extension other organizations may leverage psychology to improve performance this wide ranging and innovative book synthesises the findings of a major international study of the political economy of poverty equity and growth it is based primarily on analytical economic histories of 21 developing countries from 1950 to 1985 but also takes account of the wider literature on the subject the authors take an ambitious interdisciplinary approach to identify patterns in the interplay of initial conditions institutions interests and ideas which can help to explain the different growth and poverty alleviation outcomes in the third world three different types of poverty are distinguished based on their causes and a more nebulous idea of equity in contrast to egalitarianism is shown to have influenced policy since growth is found to be the major means of alleviating mass structural poverty much of the book is concerned with discovering explanations for policies which are found to be the most important influences on the proximate causes of growth lal and mynt also consider the available evidence on the role of direct transfers public and private in alleviating destitution and conjunctural poverty the political economy of poverty equity and growth develops a novel framework for the comparative analysis of different growth outcomes this framework distinguishes between the different relative factor endowments of land labour and capital and between the different organizational structures of present versus plantation and mining economies it also differentiates between the politics of autonomous and factional states in the countries studied breaking the analysis down into further typological subdivisions and providing important new insights into the differing behaviour of economies that are rich in natural resources and those with abundant labour these insights constitute a richer explanation for the divergent developmental outcomes in east asia compared with latin america and africa the evidence collated is used to argue for the continuing relevance of the classical liberal viewpoint on public policies for development and to show why even so nationalist ideologies

are likely to be adopted and lead to cycles of interventionism and liberalism the evidence is also used to provide an explanation for the surprising current worldwide age of reform considers the history of citizenship in yemen and tunisia to explain why democratic participation was undermined after the 2011 revolutionary wave volume 3 personality processes and individuals differences of the theories measurement and assessment techniques personality processes and individuals differences and research provides a comprehensive and in depth overview of the field of personality psychology the encyclopedia of personality and individual differences is an important resource for all psychology students and professionals engaging in the study and research of personality this book is about individuals who have made dramatic changes in their lives in the beginning these people were living as patients or victims of circumstance in the end they were living as agents free to shape the courses of their lives to choose set goals plan to make things happen rather than to experience life as events happening to them the authors describe what is involved in such remarkable transformations they identify a common structure of transformation involving four distinguishable phases they also clarify a progressive dialectic between living the plot of a patient and living the plot of an agent and show how an old plot is destroyed or deconstructed and a new plot is constructed the european journal of tourism research is an interdisciplinary scientific journal in the field treatment and rehabilitation of drug addicts it interprets and applies research findings about the causation and cure of drug addiction using the author s personality theory which is extensively compared with that of other personologists the book includes the qualitative analysis of 12 addict case studies it is especially timely in view of the need for effective legislation judicial procedures and treatment programs to deal with the opioid crisis in the united states and canada the post world war ii idea of the axial age by karl jaspers and as elaborated into the sociology of axial civilizations by s n eisenstadt in the later twentieth and early twenty first centuries continues to be the subject of intense scholarly debate examples of this can be found in recent works of hans joas and jürgen habermas in from world religions to axial civilizations and beyond an internationally distinguished group of scholars discuss advance and criticize the jaspers eisenstadt thesis and go beyond it by bringing in the critical

influence of max weber s sociology of world religions and by exploring intercivilizational encounters in key world regions the essays within this volume are of unusual interest for their original analysis of relatively neglected civilizational zones especially islam and the islamicate civilization and the byzantine civilization and its continuation in orthodox russia rationality within modern psychological theory examines the rational and irrational dimensions of human nature and of the psyche and logos harold combines the traditionally divided views of classical philosophy s affirmation of the existence of intellect and modern psychology s emphasis on immanent psychological factors over rational transcendent relations by accepting the power of being in an adequate relation to reality while still admitting the manifold ways that people evade truth and reality psychologists will be able to emphasize the power of an individual to establish a truthful relation with reality this book is recommended for scholars of psychology and philosophy this book examines national reports on contract law in each of the brics countries brazil russia india china and south africa in order to provide a comparative analysis it then establishes common principles where possible as well as a set of general soft law principles governing international commercial contracts in these countries the importance of commercial transactions in the brics countries is rapidly growing yet differences in contract law among these countries can lead to misunderstandings and disputes the rapid development of the brics instruments and the legal implications of their use suggests the need to address common legal issues that could harm the continued development of the brics economies contract law represents one of the core areas in which this process can take place addressing the salient legal issues within the brics discourse requires a comprehensive comparative approach that explores the different solutions provided by each member country in order to identify similarities and convergences this process may ultimately help to reduce the legal obstacles to and indirect costs of cross border transactions by offering a transparent and predictable legal environment for any future attempt at adopting common legal instruments lightning rod that strikes faster than lightning itself is a book dedicated to the study of the phenomenal legend in the world of boxing cus d amato this work is a collection of scientific research on the origin of cus unique style that allowed the legend of south italian descent to nurture three world boxing champions mike tyson floyd patterson jose torres and train a number of individuals in and out of the boxing ring the origin of cus style was decoded by a voluminous twenty year scientific study us ing interdisciplinary research from the fields of history archetypology fate psychol ogy sociology and anthropology the research group part of the memory research institute expeditionary corps conducted repeated scientific expeditions to italy ger many the us and spain however the conclusive milestone of this study was the apu lian calabrian expedition the course and results of which are outlined in this book lightning rod that strikes faster than lightning itself is based on a heuristic research model which includes eight separate analyses psychological criminalistic journalis tic etc this method was chosen by the author so that every reader no matter if he is a boxer or a coach historian or psychologist or simply an individual who is interested in the legendary boxing style of d amato would be able to verify the results of academic research on his own and ascertain the quality of the facts and conclusions provided this book makes the bold claim that intellectual sophistication was born worldwide during the middle centuries of the first millennium bce from axial age thinkers we inherited a sense of the world as a place not just to experience but to investigate envision and alter a variety of utopian visions emerged and led to both reform and repression this book offers a detailed overview of translational bioinformatics together with real case applications translational bioinformatics integrates the areas of basic bioinformatics clinical informatics statistical genetics and informatics in order to further our understanding of the molecular basis of diseases by analyzing voluminous amounts of molecular and clinical data it also provides clinical information which can then be applied filling the gap between clinic research and informatics the book is a valuable resource for human geneticists clinicians health educators and policy makers as well as graduate students majoring in biology biostatistics and bioinformatics the book considers the historical origins of the current wave of market oriented reform reviews existing controversies on the design of economic reforms and offers alternative criteria to evaluate policy performance in particular it focuses on issues of macroeconomic adjustment and stabilization liberalization policies reform of the state and interactions between economic and political transformation during the course of systemic transformation this book explores an important aspect of human existence humor in self translation a virtually unexplored area of research in humour studies and translation studies of the select group of international scholars contributing to this volume some examine literary texts from different perspectives sociological philosophical or post colonial while others explore texts in more extraneous fields such as standup comedy or language learning this book sheds light on how humour in self translation induces

thoughts on social issues challenges stereotypes contributes to recast individuals in novel forms of identity and facilitates reflections on our own sense of humour this accessible and engaging volume is of interest to advanced students of humour studies and translation studies cystic fibrosis cf is one of the most common fatal hereditary diseases the discovery of the cystic fibrosis transmembrane conductance regulator cftr gene 25 years ago set the stage for unraveling the pathogenesis of cf lung disease continuous refinement of symptomatic treatments and the development of mutation specific therapies which are now becoming available for a subgroup of patients this ers monograph provides an update on all aspects of cf lung disease from infancy to adulthood including current concepts on disease process improvements in early diagnosis and monitoring therapeutic approaches and patient care the book highlights important recent developments and discusses the next steps that will be required for further improvement of the life expectancy and quality of life of cf patients it will be an essential reference for basic and clinical scientists and all members of the cf team during its 500 year history the modern world system has seen several shifts in hegemony yet since the decline of the u s in the 1970s no single core power has attained a hegemonic position in an increasingly polarized world as income inequalities have become more pronounced in core countries especially in the u s and the u k global inequalities emerged as a new topic of social scientific scholarship ignoring the constant move toward polarization that has been characteristic of the entire modern world system at the same time the rise of new states most notably the brics and the relative economic growth of particular regions especially east asia have prompted speculations about the next hegemon that largely disregard both the longue durée of hegemonic shifts and the constraints that regional differentiations place on the concentration of capital and geopolitical power in one location authors in this book place the issue of rising inequalities at the center of their analyses they explore the concept and reality of semiperipheries in the 21st century world system the role of the state and of transnational migration in current patterns of global stratification types of catching up development and new spatial configurations of inequality in europe s eastern periphery as well as the prospects for the global left in the new systemic order the book links novel theoretical debates on the rise of global inequalities to methodologically innovative approaches to the urgent task of addressing them immanuel wallerstein one of the most influential yet controversial sociologists of the past half century is a touchstone in innumerable debates about globalization and the power of capitalism the nature of development in the modern era and how to come to grips with widespread inequalities while recovering the potential for social change the anthem companion to immanuel wallerstein offers a compelling guide to his writings and ideas his influences and reception and the reasons for his enduring significance with 10 original interpretive essays written by a distinguished group of international scholars importantly the contributors also advance wallerstein s work into neglected areas such as climate change global pandemics racism and gender and demonstrate his importance not just to debates in his intellectual context but to those of our times as well this companion provides a multifaceted tool for thinking with wallerstein while showing where those engaging with wallerstein s thought can take his work in the contemporary world these conference proceedings are the output of one of the first academic events of its nature happening globally targeting fashion from a communication sciences perspective including in a broad sense cultural heritage studies and marketing the chapters present theoretical and empirical interdisciplinary work on how various communication practices impact the fashion industry and on societal fashion related practices and values the special focus of this volume is how digital transformation is changing the field and its utility to practitioners using these academic insights practitioners can understand the core causes and reasons for trends and developments in the field of fashion communication and marketing continuing in the standard of excellence set by previous editions this sixth edition assesses the bureaucracies and development of governments around the world providing helpful and revealing analyses of the relationships between bureaucracies and political regimes with over 1000 literature references tables and drawings the book has been updated to reflect changes in the political systems of the former soviet union eastern europe and the developing world the editor clearly articulates recent developments in the shifting global political landscape and discusses how conditions in development administration and comparative public policy affect nation states explores the role of law in different areas of brics cooperation and the impact it can make on global governance this edited book brings together scholarly chapters on linguistic aspects of humour in literary and non literary domains and contexts in different parts of the world previous scholarly engagements and theoretical postulations on humour and the comic provide veritable resources for reexamining the relationship between linguistic elements and comic sensations on the one hand and the validity of interpretive humour stylistics on the other hand renowned stylistics scholars such as michael toolan who writes the volume

s foreword against the backdrop of nearly four decades of scholarly engagement with stylistics and katie wales who in this volume engages with charles dickens one of the most eminent satirists in english literature as well as many other european and african authors who have worked ceaselessly in the area of humour and language weigh in on the topic of language and humour in this volume together they provide a variety of interesting perspectives on the topic deploying different textual sources from different media and from different regions of the world part of the book s offering includes integrative stylistic approaches to humour in african european and american written texts examinations of social media and political humour in nigeria cameroon and zimbabwe pragmatics and humorous stance taking incongruity as comedy in works of fiction and a unified levels of linguistic analysis approach to the investigation of humour this book will be of interest to academics and students of linguistics stylistics communications and media studies and humour studies taiwo oloruntoba oju is a professor in the department of english at the university of ilorin in nigeria
