history of wheat breeding as stated by pierre pagesse chairman of groupe limagrain in his preface the future of wheat rests in our hands and in those who succeed us let us try to do this together in a visionary and determined manner

## World Wheat Book 2, vol 2 : A History of Wheat Breeding

2011

crop wild relatives cwr are a key asset for agrobiodiversity sustainable agriculture and food security overall cwr might contain genes for useful traits such as nutritional quality resistance to pests and diseases resource efficiency and adaptability to extreme weather conditions their inherent genetic diversity together with the associated diversity of microbiota is a vast resource for developing more productive nutritious and resilient crop varieties and for diversifying farming systems despite their value a wide range of cwr are threatened and face pressures e g from intensive agriculture urbanization pollution and the effects of climate change at the same time their conservation and deployment in breeding remain still scarce as a consequence knowledge is lacking about the diversity that exists and precisely how that diversity may be used for crop improvement and in farming

this study contributes to the work stream on digital sequence information of fao s commission on genetic resources for food and agriculture grfa it presents key practices and experiences related to the ways in which digital sequence information dsi is generated stored accessed and used for research and development related to grfa the report explores the availability and accessibility of dsi to the research community and the private sector in all parts of the world it also presents solutions currently being discussed for access to and use of dsi and the sharing of benefits arising from such use in addition the study discusses applications of dsi that are relevant to

grfa including dsi that is not derived from grfa but nevertheless contributes to their identification characterization use improvement and conservation further the report addresses obstacles to access and use of dsi and identifies the need for capacity building to address global imbalance in its generation and use the study demonstrates the many existing and potential applications of dsi that are highly relevant to grfa whilst stressing the importance of open access to data to facilitate research and development in food and agriculture it emphasises that the generation storage accessibility and use of dsi are fundamental to the efforts to make agriculture more sustainable access to and use of dsi face serious obstacles in many countries there is a pressing need to address the root causes of these problems which include lack of technical infrastructure financial and human resources educational and training opportunities scientific collaboration computing infrastructure reliable electricity and high speed internet the study concludes that there is a need for a regulatory environment that facilitates access to dsi whilst also maintaining the fair and equitable sharing of benefits arising from its use
