and foreign policy it is based on wide ranging research in collections of personal and official papers in australia britain the united states and canada linking up with the first volume the search for security in the pacific it offers a new and path breaking understanding of australia s relations with the world from the outbreak of the first world war to the making of peace in europe and the pacific this study explores a number of fundamental issues that shaped australia s response to the world in this era such as race and culture geopolitics and security domestic divisions and ideas of loyalty and the philosophies and personalities of the chief policy makers from the outset of this global conflict australia was involved in a hot war in europe against germany and its allies and in a cold war in the pacific against japan the british australians for reasons of sentiment and interest supported the mother country but even as they did so they were deeply concerned about japan s ambitions as a result japan figured prominently in australia s approach to the war and the peace indeed for the australians the cold war did not come to an end until the washington conference of 1921 2 when japan with the other pacific powers agreed to limit naval building and to respect existing territories in china and the pacific in tracing out this story the book throws light on many particular aspects of the hot and cold wars they include the origins of asian studies in australia intelligence gathering the secret service and loyalty leagues the fear of japan in the conscription controversy irish catholics and the anglo irish war the labour movement and the bolshevik revolution the ideological clash of the american president and the australian prime minister over peacemaking the visit of the prince of wales britishness and the failure of the idea of greater britain all influenced the development of australia s defence and foreign policy at the end of the book there is an attempt to provide an assessment of australia s leadership through these testing times and to point out the significance of this experience for a later generation of australia policy makers a study struggle against physics established wisdom and the establishment itself in 1954 charles townes invented the laser's microwave cousin the maser the next logical step was to extend the same physical principles to the shorter wavelengths of light but the idea did not catch fire until october 1957 when townes asked gordon gould about gould's research on using light to excite thallium atoms each took the idea and ran with it the independent minded gould sought the fortune of an independent inventor the professorial townes sought the fame of scientific recognition townes enlisted the help of his brother in law arthur schawlow and got bell labs into the race gould turned his ideas into a patent birth ation and a million dollar defense contract they soon had company ali javan one of townes's former students began pulling 90 hour weeks at bell labs with colleague bill bennett and far away in california a bright young physicist named ted maiman became a very dark horse in the race while schawlow proclaimed that ruby could never make a laser maiman slowly convinced himself it would as others struggled with recalcitrant equipment and military secrecy maiman built a tiny and elegant device that fit in the palm of his hand his ruby laser worked the first time he tried it on may 16 1960 but afterwards he had to battle for acceptance as the man who made the first laser beam
