Latin America in the World 2020

this book is a study of the semantics and usages of the concept of latin america in the united states both in everyday language and in social scientific discourses its guiding hypothesis is that latin america has been historically defined in american english in opposition to a self congratulatory image of the united states of america this constitutes in itself an act of misrecognition because it overlooks the ways those perceived as latin americans actually live their lives as political and social beings as a result of this practice latin americans have historically been ascribed the most contemptible characteristics and been treated in ways that suit the derogatory representations made of them the book also contains an original contribution to the debate about recognition leaning on reinhart koselleck s notion of asymmetrical counterconcepts feres jr devises an original typology of forms of misrecognition and applies it to the analysis of discourses on latin america this approach to the problem of recognition has many advantages in relation to the competing neo hegelian theory advocated by authors such as axel honneth and charles taylor it can be used as a tool to resist misrecognition without having to rely on a positive substantive conception of recognition furthermore contrary to the neo hegelian approach it is able to address practices of misrecognition that have as an object people who are not part of the national linguistic political community the book s narrative follows a chronological order in which discourses and theories about latin america are placed in their historical context and examined in search of rhetorical strategies that perpetuate forms of misrecognition in the end feres jr demonstrates that long standing north american pejorative perceptions about the peoples and countries seen as latin american found abundantly in everyday

language survive in social scientific discourse despite the reiterated claims of objectivity and value neutrality of the social sciences

The Economy of Latin America 1950

latin america in the modern world is the first text to situate the history of latin american into a wider global narrative and it does so without de emphasizing the distinctive experiences of each of the latin american countries focusing on five themes state formation the construction of national identity through popular culture and religion economics and commodities race class and gender and the environment and written by leading scholars latin america in the modern world provides students today with an entry point into understanding this vital region the authors emphasize the distinctive experiences of each of the latin american countries instead of suggesting that all latin american nations have an interchangeable heritage the authors seek to clearly identify themes topics people and intellectual currents that help to knit the history of modern latin america into a coherent category of study the book would not serve students well if it focused primarily on the history of the three largest countries mexico brazil and argentina to the neglect of others like the central american and andean nations as a consequence case studies from almost all of the countries are included at some point in the narrative when their history seems to illuminate a theme or idea particularly effectively in this fashion students will come to appreciate the great diversity of history and culture within the latin american region while simultaneously understanding how it fits into the streams and currents of world history and events more broadly

Routledge Handbook of Latin American Politics **1955**

the term latin america supposes that there is an america that is latin which can be defined in opposition to one that is not this geo political manifesto revisits the idea of latinity charting the history of the concept from its emergence in europe under france s leadership through its appropriation by the creole elite of south america and the spanish caribbean in the second half of the nineteenth century up to the present day reinstating the indigenous peoples the enormous population of african descent and the 40 million latino as in the us that are rendered invisible by the image of a homogenous latin america the author asks what is at stake in the survival of an idea which subdivides the americas he explains why an american union similar to the european union is at this point unthinkable and he insists on the pressing need to

leave behind an idea of latinity which belongs to the creole mestizo mentality of the nineteenth century
