# ***Journey toward Justice (Turning South: Christian Scholars in an Age of World Christianity)***

2013-11-05

Christianity's demographics, vitality, and influence have tipped markedly toward the global south and east. Addressing this seismic shift, one of today's leading Christian scholars reflects on what he has learned about justice through his encounters with world Christianity philosopher Nicholas Wolterstorff. His experiences in South Africa, the Middle East, and Honduras have shaped his views on justice. Through the years, in this book, he offers readers an autobiographical tour, distilling the essence of his thoughts on the topic. After describing how he came to think about justice as he does and reviewing the theory of justice he developed in earlier writings, Wolterstorff shows how deeply embedded justice is in Christian Scripture. He reflects on the difficult struggle to right injustice and examines the necessity of just punishment. Finally, he explores the relationship between justice and beauty and between justice and hope. This book is the first in the Turning South series, which offers reflections by eminent Christian scholars who have turned their attention and commitments toward the global south and east.

## **Forgiveness and Restorative Justice**

2021-06-17

The meaning of forgiveness and its role within restorative justice are highly contested. This book offers analysis from practical and academic perspectives within Christian theology against a rich canvas of related concepts, including victimhood, sin, love, and vulnerability. Critical friends of restorative justice, the authors argue that forgiveness, whether as a journey or an act, unilateral or mutual, conditional or unconditional, is necessary to achieving a fully restorative resolution to acts of harm. They also suggest that Christianity, with its meaning-giving metanarrative of restoration and preference for communitarian approaches to justice, may have epistemic value for evaluating and even deepening the theory and practice of restorative justice.

christian faith justice and a politics of mercy the benevolent community assumes that the most profound moral conflict today is between two virtues justice and mercy gilman argues that the two are organically linked through the common experience of compassion in an unjust world justice cannot establish itself but requires in public as well as private life projects of merciful benevolence mercy alone has the power to subvert patterns of injustice and mercy and projects of benevolence are tailored to establish and sustain patterns of justice especially fair economic outcomes to show this against rawls difference principle gilman argues for a distribution principle which states that social and economic inequalities should be addressed by policies that directly and primarily benefit the least advantaged members of society while at the same time minimizing burdens and or maximizing benefits for the most advantaged along the way he shows how in the united states benevolence as a public virtue was disestablished along with religion how it might and should be re established without re establishing religion and how the christian tradition provides resources for evolving morally from a liberal procedural practice of justice to one that embraces egalitarian economic justice as well finally he demonstrates how in the global community today christianity and other traditions can and should make benevolent community a reality

augustine bishop of hippo between 395 and 430 and his fellow bishops lived and worked through massive shifts in politics society and religion christian bishops were frequently asked to serve as intellectuals legislators judges and pastors roles and responsibilities that often conflicted with one another and made it difficult for bishops to be effective leaders expectations of justice in the age of augustine examines these roles and the ways bishops struggled to fulfill or failed to fulfill them as well as the philosophical conclusions they drew from their experience in everyday affairs such as oath swearing and in the administration of penance augustine and his near contemporaries were no more or less successful at handling the administration of justice than other late antique or early medieval officials when bishops served in judicial capacities they experienced firsthand the complex inner workings of legal procedures and social conflicts as well as the fallibility of human communities bishops represented divine justice while simultaneously engaging in and even presiding over the sorts of activities that animated society business deals litigations gossip and violence but also made justice hard to come by kevin uhalde argues that serving as judges even informally compelled bishops to question whether anyone could be guaranteed justice on earth even from the leaders of the christian church as a result their ideals of divine justice fundamentally changed in order to accommodate the unpleasant reality of worldly justice and its failings this philosophical shift resonated in christian thought and life for centuries afterward and directly affected religious life from the performance of penance to the way people conceived of the final judgment
