Transformative Social Change in Organizations and Institutions: A DEI Perspective

2024-01-10

due to the unfortunate events of 2020 diversity equity and inclusion dei has become trendy without the public truly understanding the systemic and structural impacts that the discipline is intended to interrupt dei impacts myriad institutions dei is not a checkbox it is soul work and until we interrogate the ills and wills of our souls the individual i will never transform the institution transformative social change in organizations and institutions a dei perspective focuses on the transformative social change that dei is meant to have within organizations and institutions covering topics such as dei strategy performance vs impact and workplace dynamics this reference work is ideal for government officials faith communities doctoral students educational agencies researchers and students

Silence: A User's Guide, Volume One

2014-09-10

silence is essential for the health and well being of humans and the environment in which they live yet silence has almost vanished from our lives and our world of all the books that claim to be about silence this is the only one that addresses silence directly silence a user s guide is just what the title says it is a guide to silence which is both a vast interior spaciousness and the condition of our being in the natural world this book exposes the processes by which silence can transfigure our lives what maggie ross calls the work of silence it describes how lives steeped in silence can transfigure other lives unawares it shows how the work of silence was once understood to be the foundation of the teaching of jesus and how this teaching was once an intrinsic part of western christianity it describes some of the methods by which the institution suppressed the work of silence and why religious institutions are afraid of silence above all this book shows that the work of silence gives us a way of being in the world that is more than we can ask for or imagine

the reader is about to embark on a journey of discovery and perhaps even reckoning religion and science have been understood as inherently at odds and inimical toward each other however both employ metaphor religion when it calls the spirit descending upon jesus a dove science when it describes electrons as a current flowing through a wire for only fluids flow and electrons are not a fluid both use myths some religions in the sense that there was a golden age of humans in a garden science when it promises unlimited progress both enlist hypothetical entities some religions when a storm heralds that the gods are angry science with the existence of a vacuum and a frictionless surface and each bears its fundamentalist contingent just observe a debate between creationists and evolutionists and the zeal and fervor with which the bible and darwin must be defended at any cost no matter what given all this it becomes readily apparent that religion and science display more in common than was once expected and that is precisely what is in peril in the following pages our expectations may the intrepid traveler benefit from the voyage

global optimization is a branch of applied mathematics and numerical analysis that deals with the task of finding the absolutely best set of admissible conditions to satisfy certain criteria objective function s formulated in mathematical terms global optimization includes nonlinear stochastic and combinatorial programming multiobjective programming control games

geometry approximation algorithms for parallel architectures and so on due to its wide usage and applications it has gained the attention of researchers and practitioners from a plethora of scientific domains typical practical examples of global optimization applications include traveling salesman problem and electrical circuit design minimize the path length safety engineering building and mechanical structures mathematical problems kepler conjecture protein structure prediction minimize the energy function etc global optimization algorithms may be categorized into several types deterministic example branch and bound methods stochastic optimization example simulated annealing heuristics and meta heuristics example evolutionary algorithms etc recently there has been a growing interest in combining global and local search strategies to solve more complicated optimization problems this edited volume comprises 17 chapters including several overview chapters which provides an up to date and state of the art research covering the theory and algorithms of global optimization besides research articles and expository papers on theory and algorithms of global optimization papers on numerical experiments and on real world applications were also encouraged the book is divided into 2 main parts

la letteratura sull'impianto cocleare comprende pochissimi libri di testo introduttivi alla materia mentre numerose pubblicazioni sono dedicate all'aggiornamento o alla spiegazione di aspetti specifici dell'argomento di fronte a questa realtà il neofita può incontrare difficoltà nella comprensione di testi specialistici a causa della mancanza delle conoscenze di base non si può negare tuttavia che anche l'esperto potrebbe aver bisogno di una visione di insieme dei vari modelli di impianto cocleare approfittando di una sintesi tecnica correlata ai concetti principali dell'audiologia e dell'otologia impianti cocleari di sandro burdo è un libro di testo introduttivo scritto da un unico autore che mantiene una sequenza logica nella trattazione degli argomenti pur trattandosi di un'introduzione la trattazione è esaustiva dell'argomento dal punto di vista tecnico ma con importanti richiami di audiologia e otologia necessari per comprendere come i vari componenti del dispositivo simulino l'anatomia fisiologia uditiva per capire la logica del coinvolgimento di un solo autore e dei benefici didattici ad essa correlati è necessario ricordare che in Italia e in particolare a Milano in passato la specializzazione in audiologia era indipendente dalla formazione in otorinolaringoiatria ed era caratterizzata da tre indirizzi tecnico medico e chirurgico trattando tutti gli argomenti relativi all'udito e all'ascolto anche per quanto riguarda i device non solo diagnostici ma anche protesici si è deciso di descrivere i dispositivi di tutte le marche ma di evitare qualsiasi commento qualitativo o di preferenza per consentire al lettore di costruirsi un'opinione personale tuttavia una lettura attenta evidenzia che i dispositivi non sono simili fra loro ma si caratterizzano anche per differenze significative che dovrebbero essere conosciute per una scelta razionale e un adattamento personalizzato dell'impianto in tal modo il clinico potrà sviluppare il suo senso critico che lo porterà ad avere una propria visione fondata su ragionamenti concreti e scientifici in altre parole non sarà preda solo degli annunci promozionali delle aziende che spesso estremizzano alcune caratteristiche del proprio prodotto nascondendone ovviamente i limiti il testo è suddiviso in tre parti principali scienze di base acustica ed elettricità anatomia e fisiopatologia uditiva tecnologia dell'impianto cocleare per un totale di 240 pagine a doppia colonna 143 figure e 13 tabelle a conferma dello scopo didattico del libro con 15 illustrazioni per pagina gli aspetti clinici sono trattati solo brevemente perché discuterne in modo approfondito avrebbe significato andare fuori tema tra l'altro gli elementi clinici come le indicazioni le controindicazioni ecc rappresentano gli unici argomenti trattati in altri libri per cui si è deciso di non ripetere concetti ormai più che noti infine può essere utile sapere che l'autore ha utilizzato il linguaggio semplice di un libro di testo liceale inserendo tutti gli argomenti in un progetto organico in cui interagiscono i tre temi principali appena citati

the mediterranean area shows a great diversity of livestock systems depending on local resources and traditions but also on the networking space where informational resources are available for producers during the last decades a lot of innovations have been conceived or introduced in the mediterranean area allowing livestock systems to remain competitive the book looks at two main issues firstly it gives an updated review on the main innovations that significantly changed the activities of livestock production in the mediterranean area in the recent past secondly the focus lies on the extent to which these innovations improve the efficiency ensure the socio cultural basis or reduce the environmental impact of livestock systems one major finding is a new vision of innovating systems based on the distinction between regulated innovation when aims are fixed and innovative design when aims are questioned innovations reported in the book are dealing with a set of concerns they concern the production techniques the work organization the equipment and infrastructures the collective features for selection reproduction feeding or sanitary devices they also concern the local organization such as product labelling new dynamics around local breeds collective rules for supply basin or approaches of new products for new markets more recently some innovations focus on environmental impacts of livestock production due to an increasing consciousness of those kinds of problems in the final part of the book a round table copes with a crucial question are traditions in mediterranean livestock activities to be considered an obstacle or a source of innovation this book provides a set of updated information and knowledge useful for researchers students extension services and policy makers in the field of animal science

this book focuses on the use of farm level micro and macro data of cooperative systems and networks in developing new robust reliable and coherent modeling tools for agricultural and environmental policy analysis the efficacy of public intervention on agriculture is largely determined by the existence of reliable information on the effects of policy options and market developments on farmers production decisions and in particular on key issues such as levels of agricultural and non agricultural output land use and incomes use of natural resources sustainable centric management structural change and the viability of family farms over the last years several methods and analytical tools have been developed for policy analysis using various sets of data such methods have been based on integrated approaches in an effort to investigate the above key issues and have thus attempted to offer a powerful environment for decision making particularly in an era of radical change for both agriculture and the wider economy
