top academic scholars ponder the question of ethics as it pertains to all aspects of leadership in business government and nonprofit organizations if leaders were defined by their influence on history hitler would be on par with gandhi lincoln and mother theresa yet most of us believe that our superiors have a responsibility to exercise power with a purpose far greater than any political agenda and a motive more noble than personal gain this thought provoking collection of essays explores the ethical challenges that leaders face in their relationships with followers the choices they make and the ways in which they influence others joanne ciulla and her contributors examine the traits and characteristics of top tier leaders she questions the assumption that moral fortitude is an inherent part of being in charge analyzes the roles that charisma morality and delegation play in the leadership paradigm and considers whether individuals who want to lead with integrity but are sometimes forced to get their hands dirty for their constituents can be called moral leaders readers will gain an appreciation for how ethics is not an add on to the practice of leadership but rather an integral part of it an element that informs the very idea of what it means to lead and to lead well
