imagine a bull and a sheep harnessed together at the same yoke what would happen the most likely thing would be utter chaos as they struggle to separate and go off in their own directions the plough would slice dangerously about behind them no furrow would be

straight and in the end the weaker animal would be trampled this is the scenario evoked by anselm on the day he was controversially made archbishop of canterbury you are trying to harness together at the plough under one yoke an untamed bull and an old and feeble sheep what will come of it anselm's question is the beginning of a remarkable story what came of it that is to say what happened between the bull william ii king of england and the sheep archbishop anselm in the closing years of the 11th century is one of the great untold sagas of the medieval period

purchase of this book includes free trial access to million books com where you can read more than a million books for free this is an ocr edition with typos excerpt from book chapter iii the mouflon or wild sheep of europe and its forerunners when the great swedish naturalist linnaeus wrote his systema natura in the middle of the eighteenth century he appears to have been ignorant of the existence of a wild sheep in the islands of sardinia and corsica and it was therefore not till some years later that this mouflon as it is called by the french the musmon or musimon of the natives of sardinia and corsica received a scientific name the designation ovis musimon having been given to this species by the german naturalist schreber in 1795

at a later period it was thought that the mouflon differed in certain important structural features from domesticated sheep the typical representatives of the genus ovis and it was accordingly referred to a genus by itself under the name of caprovis subsequent investigations showed however that this supposed difference is non existent and there are good grounds for regarding the mouflon as the ancestral stock from which some of the european tame breeds have taken origin if it could be definitely plate ii fig i fig 2 fig i a mouflon ram fig 2 a soa ram ascertained which breed or breeds originated from the mouflon it would be obvious that if such breed could be regarded as the type of the ovis aries of linnaeus the proper designation of the mouflon would be o aries musimon the name mouflon or muflon appears to have been invented like several others in natural history by the french naturalist buffon the animal pi ii fig 1 is about the size of an average tame sheep but much more neatly built so that it has a more antelope like appearance the resemblance being enhanced by the replacement of the woolly fleece by a coat of close lying hair in common with all the
