the brilliant visionary yarn paintings of the shaman artist jose benitez sanchez emerge transformed into two dimensional form from fleeting sublime visionary experiences triggered by the complex chemistry of the divine peyote cactus benitez's visions are of the huichol universe in mexico's rugged sierra madre occidental as that world came into being in the first times of

creation and transformation and in the ongoing magic of a natural environment that is alive and without firm boundaries between the here and now and the ancestral past modern yarn paintings more than 30 in the university of pennsylvania museum s collection are illustrated here have their roots in the sacred art of communication with numberless male and female ancestors and native deities related in the two remarkable huichol origin myths also presented here to shed some light on native american culture and provide some understanding of the religious experience that informs it

the huichol wixarika people claim a vast expanse of mexico s western sierra madre and northern highlands as a territory called kiekari which includes parts of the states of nayarit jalisco durango zacatecas and san luis potosí this territory forms the heart of their economic and spiritual lives but indigenous land struggle is a central fact of mexican history and in this fascinating new work paul liffman expands our understanding of it drawing on contemporary anthropological theory he explains how huichols assert their sovereign rights to collectively own the 1 500 square miles they inhabit and to practice rituals across the 35 000 square miles where their access is challenged liffman places current access claims in historical perspective tracing huichol communities long term efforts to redress the inequitable access to land and other resources that their neighbors and the state have imposed on them liffman writes that the cultural grounds for territorial claims were what the people i wanted to study wanted me to work

on based on six years of collaboration with a land rights organization interviews and participant observation in meetings ceremonies and extended stays on remote rancherías huichol territory and the mexican nation analyzes the sites where people define huichol territory the book s innovative structure echoes huichols own approach to knowledge and examines the nation and state not just the community liffman s local regional and national perspective informs every chapter and expands the toolkit for researchers working with indigenous communities by describing huichols ceremonially based placemaking to build a theory of historical territoriality he raises provocative questions about what place means for native peoples worldwide
