Appendix to the Journals of the House of Representatives of New Zealand 1883

the proceedings or notices of the member institutes of the society form part of the section proceedings in each volume lists of members are included in v 1 41 43 60 64

Appendix to the Journals of the House of Representatives of New Zealand 1885

includes proceedings of member institutes of the society and of the society s science congress

Transactions and Proceedings of the New Zealand Institute 1926

every year that passes without a tsunami means that we re just that much closer to our next one what can we do to ensure we re prepared when the next catastrophic tsunami strikes the ferocious waves of a tsunami can travel across oceans at the speed of a jet airplane they can kill families destroy entire cultures and even gut nations to understand these beasts in our waters well enough to survive them we must understand how they re created and learn from the past in this book tsunami specialists james goff and walter dudley arm readers with everything they need to survive a tsunami and maybe even avoid the next one the book takes readers on a historical journey through some of the most devastating tsunamis in human history some of the quirky ones and even some that may not even be what most of us think of as tsunamis diving into personal and scientific stories of disasters tsunami pulls readers into the many ways these waves can be generated ranging from earthquakes and volcanic eruptions to explosions landslides and beyond the book provides overviews of some of the great historical events the 1755 lisbon 1946 aleutian 1960 chile and 2004 indian ocean tsunamis but also some of the less well known as well such as the 1958 lituya bay 563 ce lake geneva a 6 000 year old papua new guinean mystery and even a 2 5 million year old asteroid this is not straight science though each event is brought to life in a variety of ways through stories of survival human folly and echoes of past disasters etched in oral traditions and the environment the book combines research from oceanography biogeography geology history archaeology and more with data collected from over 400 survivor interviews alongside carefully selected images

mpls in the sdn era interoperable scenarios to make networks scale to new services
and the scientific measurements of these tsunamis the book offers tales of survival heroism and tragic loss through a balanced combination of personal experience the earth s changing environment tales of tragedy and a recount of oral traditions tsunami allows readers to engage with a new scientific approach to these overwhelming waves the resulting book unveils the science of disaster like never before
