Planets and their Aspects in Different Houses for Capricorn Ascendant (10 of 12) 2020-09-12

first published in 2007 at the turn of the twentieth century the author spent three years in japan at the heart of what he saw as a revolution the modernization of the meiji era was well underway but far from complete all around him watson saw orientalism and feudalism jostling with the twentieth century in strange juxtapositions that produced a melange that he found inspiring disappointing and irritating but always interesting for as he wrote there had been no spectacle on earth like it since time began while other

~~observers of japan wrote of the old or the new japan or suggested that the~~
transition from one to the other had been accomplished easily and gracefully
watson set out to reveal all the contradictions anachronisms tragicomic
consequences and peculiar manifestations of meiji westernisation his eye and
pen are sharp but his underlying concern is what the ultimate outcome of this
enforced modernisation will be the question always before him is can a nation
forget its origins identity and culture watson prowls the material and
immaterial world of tokyo metropolis of the revolution alert for dissonance the
japanese dress reform movement produces costumes of supreme inelegance the
simplicity of the japanese home is disturbed by the discords of european
innovations the bathhouses are no longer mixed as the book ends watson sees
constitutional government in japan losing ground an intimation of the political
events of the next half century this is a thought provoking book first for the
unique account it gives of the contradictions and tensions beneath the surface
of the accepted version of the japanese modernisation narrative and also for
the questions watson poses about the effect of westernisation of japanese
identity and nationality as timely now as it was a century ago

this is an introductory account of social theory and the central role of
enlightenment within it tom osborne argues that contemporary social theory can
only fail when viewed as a science of society and rather than focusing upon the
question of society or even modernity should focus on the question of human
nature the most immediate and central topic of such a social theory should be
the question of enlightenment however the book departs from traditional
accounts locating the vocation of social theory in the system of values
established in the original enlightenment by the french philosophers and others
rather it makes a strong argument for the ethical status of enlightenment going
on to analyze particular regimes of enlightenment in modernity namely those
associated with the social ethics of science expertise intellect and art
