poverty increased inequality and social exclusion are back on the political agenda not only as a consequence of the great recession of 2008 but also because of a seemingly structural trend towards increased inequality in advanced industrial societies that has persisted since the 1970s policies in labor markets social policy and political representation are strongly linked in the creation widening and deepening of insider outsider divides a process known as dualization while it is certainly not the

only driver of increasing inequality its development across multiple domains makes dualization one of the most important current trends affecting developed societies the comparative perspective of this book provides insights into why nordic countries witness lower levels of insider outsider divides whereas in continental liberal and southern welfare states they are more likely to constitute a core characteristic of the political economy most importantly the comparisons presented in this book point to the crucial importance of politics and political choice in driving and shaping the social outcomes of deindustrialization while increased structural labor market divides can be found across all countries governments have a strong responsibility in shaping the distributive consequences of these labor market changes insider outsider divides are ultimately the result of political choice a landmark publication this volume is geared for faculty and graduate students of economics political science social policy and sociology as well as policymakers concerned with increasing inequality in a period of deep economic and social crisis

the true story only joseph wambaugh could tell a band of california cops set loose in no man s land to come home heroes or come home dead not since joseph wambaugh s bestselling the onion field has there been a true police story as fascinating as totally gripping as lines and shadows the media hailed them as heroes others denounced them as lawless renegades a squad of tough cops called the border crime task force a commando team sent to patrol the snake infested no man s land south of san diego not to apprehend the thousands of illegal aliens slipping into the u s but to stop the ruthless bandits who preyed on them nightly

relentlessly robbing raping and murdering defenseless men women and children the task force plan was simple they would disguise themselves as illegal aliens they would confront the murderous shadows of the night yet each time they walked into the violent blackness along the border they came closer to another boundary line a fragile line within each man and crossing it meant destroying their sanity and their lives praise for lines and shadows with each book it seems mr wambaugh s skill as a writer increases in lines and shadows he gives an off trail action packed true account of police work and the intimate lives of policemen that for my money is his best book yet the new york times book review a saga of courage craziness brutality and humor one of his best books comparable to the onion field for storytelling and revelatory power chicago sun times

around 15 000 years ago almost all humans lived in small mobile foraging bands by about 5 000 years ago the first city states had appeared this radical transformation in human society laid the foundations for the modern world we use economic logic and archaeological evidence to explain six key elements in this revolution sedentism agriculture inequality warfare cities and states in our approach the ultimate cause of these events was climate change we show how shifts in climate interacted with geography to drive technological innovation and population growth the accumulation of population at especially rich locations led to creation of group property rights over land stratification into elite and commoner classes and warfare over land among rival elites this set the stage for urbanization based on manufacturing or military defense and for elite controlled states based on taxation our closing chapter shows how these developments eventually resulted in contemporary global civilization
