AQA GCSE COMB SCI HIGH REV EX PR SB EBK 2020-07-16 education is a source of national pride in Lebanon when the general public was asked how the education system was performing 76 percent of respondents had a positive opinion and these satisfaction rates have been consistently high over the years however perception of education quality does not reflect the reality of the sector and learning outcomes which are the determining metrics of success in education have been lower than the international average with a declining trend

since 2007 this volume seeks to uncover why the education system in lebanon is not reaching its full potential it uses a political economy approach to study the drivers and factors that guide education operations to produce and utilize education outcomes this includes the study of context stakeholders and processes that shape education policies institutions and activities it also aims to identify enablers of and constraints on policy change and implementation as well as the achievement of results in this context the analysis encompasses how education policies are developed how education consumables such as curricula textbooks and learning materials are produced distributed and used by learners how education services are delivered and monitored and how achieved results are measured it includes the identification of the most influential actors in the education arena as well as their vested interests it also examines unfavorable frameworks for action that are likely to block the adoption of reforms and delay or derail their implementation the system level analysis presented in this volume used a mixed method approach qualitative and quantitative analyses were conducted based on a review and analysis of more than 1 900 research papers articles and books laws and policies expenditures trends and enrollment and outcome indicators primary methods of inquiry were also used and included interviews focus group discussions and a household based perception survey
