Contracts and Commercial Transactions 2014-10-30

responding to the call to place more emphasis on practical skills contracts and commercial transactions is a groundbreaking text that immerses the reader in real agreements made between sophisticated parties so the reader can develop the ability to read understand and draft contracts effectively drawing upon their collective experiences in the classroom and the boardroom as well as in law firm and in house practice authors david zarfes and michael bloom in contracts and commercial transactions explore actual agreements between sophisticated parties along the way they teach the reader to read and understand contracts with an emphasis on how a decision maker be it a judge arbitrator corporate executive or senior partner might later understand those same contracts contracts and commercial transactions features actual agreements formatted as whole documents that support the exercise of contract reading and analysis insight and advice from expert practitioners from law firms such as sidley austin and simpson thacher and companies such as microsoft and jpmorgan chase that emphasize the realities of legal practice from the perspective of real world lawyers explanations and analysis from esteemed academics at law schools such as chicago and nyu that explain the nuances of legal matters that pertain to contractual documents focus points that preface each contract highlight key aspects of the document methodical and repeated exposure to provisions that teach the reader to recognize and understand contractual concepts a consistent emphasis on the building block provisions typically found in contracts drafting tips integrated throughout the book

Contracts 2010-12-27

this concise paperback which will be a valuable supplementary text to any traditional contracts casebook combines cases and actual contracts to bring a real world practical perspective to the first year contracts classroom contracts a transactional approach fills the long felt need by professors students and practitioners for a teaching approach to contracts that focuses on practical and transactional skills and contracts a transactional approach introduces business contracts and transactions to the first year contracts class in a unique fashion actually executed agreements between sophisticated parties give students exposure to the sort of agreements they will encounter in practice as either a litigator or a transactional attorney agreements are lightly edited and are presented as whole documents unbroken by discussion to force the student to read and analyze contracts in their entirety focus points and where appropriate practitioner comments before each agreement help focus the student s attention on important concepts the authors begin with the simplest agreement and iteratively build on the same lessons the discussion is tailored to basic provisions and their interaction with contract law enabling students to build familiarity with once seemingly foreign contractual provisions and concepts lessons focus on the building block provisions e g recitals representations warranties indemnities limitations of liability restrictive covenants liquidated damages typically found in sophisticated contracts including the judicial treatment of those provisions practitioner comments from experts in the field provide insight

and advice on relevant topics to give a real world and practical perspective and to drive home the relevance of these concepts to students this book teaches students how to read and understand contracts and to anticipate how judges may read and understand contracts so that the student can better draft contracts drafting tips are sprinkled throughout the book

Feature Selection and Enhanced Krill Herd Algorithm for Text Document Clustering 2018-12-18

this book puts forward a new method for solving the text document td clustering problem which is established in two main stages i a new feature selection method based on a particle swarm optimization algorithm with a novel weighting scheme is proposed as well as a detailed dimension reduction technique in order to obtain a new subset of more informative features with low dimensional space this new subset is subsequently used to improve the performance of the text clustering tc algorithm and reduce its computation time the k mean clustering algorithm is used to evaluate the effectiveness of the obtained subsets ii four krill herd algorithms khas namely the a basic kha b modified kha c hybrid kha and d multi objective hybrid kha are proposed to solve the tc problem each algorithm represents an incremental improvement on its predecessor for the evaluation process seven benchmark text datasets

are used with different characterizations and complexities text document td clustering is a new trend in text mining in which the tds are separated into several coherent clusters where all documents in the same cluster are similar the findings presented here confirm that the proposed methods and algorithms delivered the best results in comparison with other similar methods to be found in the literature

this wide ranging theme takes braudel s concept of the mediterranean as its starting point braudel s vision of an enclosed sea as a geographical opportunity for economic integration between nations with different religions languages and ethnicities and political bodies still functions as a model for studies on a wide range of contexts the goal of the 50th study week was to go beyond the study of individual systems in isolation and to combine instead different analysis of open and enclosed seas or coastal areas in order to understand the integration role played by maritime connections in europe since in pre industrial civilizations water transport was easier than land transport the time has come to bring attention to the way these relationship networks operated both on a european level and with asian and north african trade partners this volume starts from the great research traditions which have however rarely been integrated on a larger and continental scale and analyses them on either a regional or thematic basis immanuel wallerstein has developed braudel s concept by conceptualising its intercultural and transnational dimensions and its role in the system of labour he called it a world system not because it involves the whole world but because it is larger than any legally defined political unit and it is a world economy because the base link between the different parts of the system has an economic nature the various regional research aspects and traditions have been linked together in a coherent approach which aims at evaluating what geographical

nautical technical economic legal social and cultural elements influenced the emergence of the various regional networks and how these worked the nature and role of seaports as nodal points of sea routes and of their hinterland through rivers canals and roads the commercial and personal ties between merchants and shipowners in various ports how regional networks connected with each other and how over time they ended up integrating into larger units how private networks initially between merchant and seafarer organizations ended up dealing with local authorities and after their growth with states and empires in order to protect their interests
