provides the most up to date and comprehensive review of contemporary research in education policy implementation a companion to allan r odden s education policy implementation also published by suny press this book presents original work by a new generation of scholars contributing to education policy implementation research the contributors define education policy implementation as the product of the interaction among particular policies people and places their analyses of previous generations of implementation research reveal that contemporary findings not only build directly on lessons learned from the past but also seek to deepen past findings these contemporary researchers also break from the past by seeking a more nuanced contingent and rigorous theory based explication of how implementation unfolds they argue that researchers and practitioners can help improve education policy implementation by not asking simply what works but rather focusing their attention on what works for whom where when and why meredith i honig is assistant professor of educational leadership and policy studies at the university of washington at seattle this brand new text examines power and inequalities and how these are central to our understanding of how policies are made and implemented it introduces the concepts and theoretical approaches that underpin the study of the policy process reflects upon key developments and applies these the practice of policy formulation and implementation bringing the major current insights in implementation research and theory together public policy implementation and governance reviews the literature on public policy implementation relating it to contemporary developments in thinking about governance the text stresses the continuing importance of a focus upon implementation processes and explores its central relevance to the practice of public administration in light of the changing nature of governance hill and hupe suggest strategies for both future research on and management of public policy implementation their basic approach is two fold firstly to understand the process of implementation and secondly to address how one might control and affect this process re exploring the state of the art of the study of implementation as a sub discipline of political science and public administration this book will be essential reading for students and researchers in public policy social policy public management public administration and governance this is an excellent and much needed book hill and hupe have provided a well written and highly accessible account of the development of implementation studies which will be immensely valuable to everyone concerned with understanding implementation in modern policy making professor wayne parsons university of london the widespread popularity of evaluation is based on the need to provide evidence of the effectiveness of policies and programmes this book sees evaluation as an inherently political activity and using a wide range of examples it relates practical issues in evaluation design to their political contexts this book presents an overview of why implementation research has contributed to a major reconsideration of the process of policy formation and offers conceptual frameworks that employ implementation research to develop a fuller understanding of the entire policy process the contributors caution the error of assuming that implementation is the main factor in policy making and that once implementation is taken care of policies will be effective they attempt to place implementation in the broader policymaking process and show its relationship to the other parts of the policy cycle additionally several of the contributors develop explanatory models that cut across the research dichotomies of the prevailing top down and bottom up approaches and establish an agenda for future research the change process is described in this text examining the historical social and economic influences on educational policy reform the three themes covered in this volume are politics and educational reform politics into policy and policy implementation and educational reform phenomena this short guide provides a concise and accessible overview of the entire policy cycle taking the reader through the various stages of agenda setting policy formulation decision making policy implementation and policy evaluation public officials at every level of government play a vital role in the development adoption and implementation of government a clear gap exists between european union eu level policymaking and member state implementation previous research has neglected to fully define factors that encourage or prevent implementation processes and instead focused on upstream decision making processes or downstream effects of policy simona milio here proposes a shift in analytical focus towards policy implementation since this constitutes a crucial common pathway that determines whether a policy actually becomes effective or not eu implementation deficits appear to be influenced by problems related to the multi level structure of european policy making successful implementation will only occur if relevant policy actors at national and sub national levels are persuaded to co operate with eu policy goals furthermore this co operation is not possible unless all parties manage the complex policy networks and implementation regimes responsible for putting european policies into force within this framework this book answers three important questions 1 is the eu multi level governance system weakening the implementation of policies 2 are national and sub national governments capable of dealing with the challenges imposed by multi level governance 3 which factors account for differences in implementation performance among member states in order to answer these questions simona milio s research explores the influence of two variables on implementation processes administrative capacity and political stability cohesion policy is chosen as the focus of this study since it has demonstrated a dramatically different implementation pace among eu member states over the past 20 years three eu member states are chosen to test the hypothesis italy appears to be a pertinent example given its constant struggle to conform to eu directives and to implement cohesion policy spain is chosen since in contrast to the italian scenario it represents the best performing member state in terms of implementation finally poland is studied as a case where a shift from centralization towards decentralization has occurred in order to implement cohesion policy and integrate the multi level governance system the ideal
