an expansive history of how an economic shock a half century ago created a world that is addicted to mass migration. the oil shock of 1973 changed everything. it brought the golden age of american and european economic growth to an end. it destabilized middle eastern politics and it set in train processes that led to over one hundred million unexpected and unwanted immigrants in war, work, and want. randall hansen asks why. against all expectations global migration tripled after 1970. the answer he argues lies in how the opec oil crisis transformed the global economy. middle

eastern geopolitics and as a consequence international migration the quadrupling of oil prices and attendant inflation destroyed economic growth in the west while flooding the middle east with oil money american and european consumers their wealth drained rebuilt their standard of living on the back of cheap labor and cheap migrants the middle east enjoyed the benefits of a historic wealth transfer but oil became a poisoned chalice leading to political instability revolution and war all of which resulted in tens of millions of refugees the economic and migratory consequences of the opec oil crisis transformed the contours of domestic politics around the world they fueled the growth of nationalist populist parties that built their brands on blaming immigrants for collapsing standards of living willfully ignoring the fact that mass immigration was the effect not the cause of that collapse in showing how war the main driver of refugee flows work labor migrants and want the desire for ever cheaper products made by migrants led to the massive upsurge in global migration after 1973 this book will reshape our understanding of the past half century of global history
