in their first book ten rules for strategic innovators the authors provided a better model for executing disruptive innovation they laid out a three part plan for launching high risk high reward innovation efforts 1 borrow assets from the existing firms 2 unlearn and unload certain processes and systems that do not serve the new entity and 3 learn and build all new capabilities and skills in their study of the ten rules in action govindarajan and trimble observed many other kinds of innovation that were less risky but still critical to the company s ongoing success in case after case senior executives expected leaders of innovation initiatives to grapple with forces of resistance namely incentives to keep doing what the company has always done rather than develop new competence and knowledge but where to begin in this book the authors argue that the most successful everyday innovators break down the process into six manageable steps 1 divide the labor 2 assemble the dedicated team 3 manage the partnership 4 formalize the experiment 5 break down the hypothesis 6 seek the truth the other side of innovation codifies this staged approach in a variety of contexts it delivers a proven step by step guide to executing launching managing and measuring more modest but necessary innovations within large firms without disrupting their bread and butter business

strategy to performance gaps foster a culture of under performance unrealistic plans create the  
expectation throughout the organisation that plans simply will not be fulfilled this book shows how  
to overcome such failings and implement strategy effectively common failings include companies  
rarely track their performance against long term plans less than 15 of companies make it a regular  
practice to go back and compare the business results with the performance forecast for each  
business unit in its prior years strategic results results rarely meet projections when companies do  
track performance it rarely matches the prior years projection the consequence is year after year of  
under performance relative to the original plan a lot of value is lost in translation a combination of  
poor communications misapplied resources limited accountability and lack of information creates

the four disciplines of execution is about a simple proven formula for reaching the goals you want to reach as a business or individual in covey s experience the thing that most undermines the ability to execute goals is what he calls the whirlwind those urgent tasks that must be done simply to keep an organization alive as covey shows the only way to execute new important goals is to separate those goals from the whirlwind the four disciplines allow leaders to create a strategy that requires a change in behaviour since only by ensuring that everyone on the team understands the goal knows what to do to reach it and knows whether progress is being made will a leader produce consistent breakthrough results while sustaining the urgent work of the whirlwind the four disciplines of execution are 1 focus on the wildly important 2 act on the lead measures 3 keep a compelling scoreboard 4 create a cadence of accountability for more than a decade franklin covey has been studying what it takes to achieve important goals and in this book they share success stories from a wide range of companies that have implemented the four disciplines to result in greater profits increased market share and improved customer satisfaction this way of thinking is essential to any company that wants to not only weather but thrive in this economy this edition is specifically adapted for the south asia market by rajan kaicker ceo of franklin covey india featuring anecdotes and advice to reflect this emerging market
