this ibm redbooks publication provides a getting started level of information about supporting the ibm virtualization engine ts7510 under i5 os primarily using the backup recovery and media services brms 5722 br1 management product brms is the primary backup and recovery management product for i5 os this book cannot make you an expert in i5 os backup and recovery or in the use of brms it also cannot make you an expert in full usage and management of the ibm virtualization engine ts7510 capabilities more complete coverage of the ts7510 is included in the book ibm virtualization engine ts7510 tape virtualization for open systems servers sg24 7189 however this book does provide sufficient information and examples to get you up and running with the ibm virtualization engine ts7510 attached to an i5 os partition or system using brms this book also helps you to understand where the ibm virtualization engine ts7510 can fit into your complete set of backup and recovery processes where multiple systems or servers or logical partitions have to save data to a common repository the ts7510 helps you to

minimize your backup window facilitates data sharing among the multiple systems and helps you to minimize your total cost of ownership tco in the backup and recovery area
