## **No Easy Solution: A Smorgasbord of Factors Drive Remittance Costs**

2021-07-30

there has been a global push to decrease the cost of remittances since at least 2009 which has culminated with its inclusion in the sustainable development goals in 2015 despite this effort and the emergence of new business models remittance costs have been decreasing very slowly disproving predictions that sharp declines would be just around the corner in addition remitting to poorer countries remains very expensive oddly this situation has not been able to elicit academic interest on the drivers of remittance costs this paper delved deeply into the remittances ecosystem and found a very complex heterogenous and unequal environment one in which costs are driven by a myriad of factors and where there are no easy and quick solutions available which explains the disappointing outcome so far nonetheless it also shows that while policymakers have limited room to act they still have a very important role to play

## **Paperless Trade:Oppertunities, Challenges and Solutions**

2002-01-01

a digital divide threatens the global trade regime and it is not narrowing it is rapidly becoming an unbridgeable chasm nor is this a problem merely for developing countries the headlong trend toward dematerialisation of trade documents in the developed world will

grind to a halt unless all trading countries without exception possess the legal and operational ability to participate in paperless trade this challenging work not only describes the obstacles to universal support for paperless trade but also provides solutions that can be implemented if stakeholders make the collective effort to achieve this most desirable and in fact necessary goal dr laryea investigates such central issues as the following legal problems and security risks not encountered in paper documentation accommodating low tech problems with electronic documentation and funding the construction of information and communication technology infrastructure in developing countries the presentation focuses on each of the essential contract documents in turn from the quotation to the documentary credit explaining exactly how the electronic versions of each work particularly in terms of security and why each is desirable as the first comprehensive set of practical proposals from a truly global perspective for the speedy dematerialisation of trade documents paperless trade is essential reading for traders practitioners academics and national and international officials and policymakers engaged in facilitating world trade

in this concern neutrosophic logics and neutrosophy in general established by prof smarandache is one of the promising research instruments which could be successfully applied by a theoretical physicist naturally neutrosophic logics being a part of modern logics states that neutralities may be between any physical states or states of space time in particular this leads sometimes to paradoxist situations when two opposite states are known in physics while the neutral state between them seems absolutely impossible from a physical viewpoint meanwhile when considering the theoretically possible neutralities in detail we see that these neutral states indicate new phenomena which were just discovered by the experimentalists in the last decade or shows a new field for further experimental studies as for example unmatter which is a state between matter and antimatter research papers presented in this collection manifest only a few of many possible applications of neutrosophic logics to theoretical physics d rabounski the multi space with its multi structure is a theory of everything it can be used for example in the unified field theory that tries to unite the gravitational electromagnetic weak and strong interactions in physics f smarandache

non aqueous solutions 5 is a collection of lectures presented at the fifth international conference on non aqueous solutions held in leeds england on july 5 9 1976 the papers explore reactions in non aqueous solutions as well as the thermodynamic and kinetic properties of non aqueous solutions examples of the use of spectroscopic techniques are presented and solutions in molten salts are given metals in solution and liquid metal solutions are also considered this book is comprised of 12 chapters and begins with a review of a general scheme which considers the species formed by cation electron and electron electron interactions at dilute to moderate concentrations along with the influence of the solvent and the metal on these interactions the discussion then shifts to the application of electron spin resonance spectroscopy to the study of solvation the influence of solvent properties on ligand substitution mechanisms of labile complexes and the effect of acidity on chemical reactions in molten salts subsequent chapters deal with the chemistry of solutions of salts in liquid alkali metals preferential solvation in kinetics and the use of non aqueous solvents for preparation and reactions of nitrogen halogen compounds results of raman spectroscopic studies of non aqueous solutions and spectroscopic studies of coordination compounds formed in molten salts are also presented this monograph will be of interest to chemists

professor kun huang is widely known for his collaboration with max born in writing the classic monograph dynamical theory of crystal lattices during his years of active research he has made important contributions to solid state physics this collection of papers is selected at his own choice as representing his most influential works included is his work on the interaction of radiation field with polar lattices and the resulting coupled vibration modes later known as polariton the systematic development of his theory of radiative and nonradiative multiphonon transition processes associated with lattice relaxation his early prediction of diffuse x ray scattering due to crystal defects and his research works on low dimensional semiconductor structures and more professor huang has found by his experience that

scientists interested in these papers often want to know more particulars underlying the research work such as background motivation and rationale involved thus he was led to write a commentary which is published alongside the papers
