this is a text geared to the practical concerns of educators involved in the education of students with behavior disorders the book identifies the specific problem behaviors e g hyperactivity aggression etc as the primary points of reference to set the stage for a discussion of intervention alternatives the text also briefly reviews the characteristics of students with behavior disorders and develops the link between assessment and intervention

Extraordinary Disorders of Human Behavior

in this work the raman far infrared dielectric and group theoretical properties of proustite Ag_3AsS_3 and pyrargyrite Ag_3SbS_3 were studied the data and analyses provide information about the long wavelength lattice vibrations of these materials as well as characterize anomalous dielectric

behavior at elevated temperatures 250k the raman scattering experiments resulted in the observation of 6a 1 and 13e fundamental vibrational modes for both materials the forward and back scattering raman experiments enabled the longitudinal and transverse optic phonons to be separated a 1 using these results and the lyddane sachs teller relation the low frequency dielectric constant was calculated an anomalous dielectric behavior at elevated temperatures was attributed to silver ionic conduction in the material and not to a lattice mechanism ferroelectric phase transition a model was proposed in which the differences in conductivities of the bulk and space charge interface region lead to an interfacial polarization and concomitant rise in the dielectric constant

organizational behavior the ultimate reality show three years ago when the previous edition of this book was published enron and worldcom were successful and highly acclaimed companies involvement in a dot corn was an assured path to riches and september ii was just a date on the calendar today that s all changed in a very short time it s become a different world especially the business world companies that once moved from bricks to clicks today are returning to bricks but

are keeping the clicks as well many organizations that downsized in a sagging economy subsequently rehired employees only to downsize once more and workplaces that used to be considered safe havens from the uncertainties of a sometimes evil world today are considered far more vulnerable than ever because the field of ob is constantly adjusting to reality we think of it and this book as the ultimate reality show as in the tv show survivor only the most adaptable individuals and teams in the workplace can be expected to make it to tomorrow and as in the tv show big brother relationships with other people also hold the key to success at work finally just as winners in these television programs stand to receive large sums of money and are likely to enjoy the experience of playing the game so too do employers and employees benefit financially and personally when they have mastered ob unlike these so called reality shows with their carefully scripted scenarios and meticulously chosen casts however behavior in organizations is reality its effects are ongoing and profound and this is why we consider it to be the ultimate in reality and why we put so much care into preparing this book topic coverage old and new you would not have a serious ob book without paying attention to weber s concept of bureaucracy maslow s need hierarchy theory and dozens of other classic theories and studies such works are to be found on these pages competing for space are an equal number of more contemporary approaches to ob that also have received our attention consider for example just a few of the many new topics covered in this book ethics audits corporate social responsibility e training chief knowledge officer successful intelligence emoticons organizational compassion religious intolerance cyber venting and much more

religion in human life certainly qualifies as a basic topic for this series it is not an easy subject to treat effectively in brief compass edward norbeck has done so gracefully and informatively he develops two themes the description of religious events rituals and states of mind and the nature of anthropological aims views procedures and interpretations the interweaving of these two themes provides a view of religion as an anthropological subject and of religion as a process in human life that is unexpected in this short book instructors of anthropology familiar with anthropological writing on religion will find that the author has not only touched upon many standard topics included in the study of religion but has also included treatments of material not ordinarily covered in standard anthropological works such as etiquette and religion religion and human play rites of reversal and certain aspects of religious transcendence

Twenty-five years of objective study of the higher nervous activity (behaviour) of animals, translated from the Russian by W. H. Gantt with the collaboration of G. Volborth and an introduction by W. B. Cannon

the introduction to this paper discusses the notion of human creativity and raises the question of designing a creative computer program creativity is assumed not to imply the possession of special mental equipment a theory of creativity should be a theory of intellect which accounts for normal performance and enhanced performance in the same terms art making is described as a form of creative behavior which demonstrates the important of non rational features it is argued that the central feature of enhanced intellectual performance is the individual s ability to modify by the manipulation of internal representations his her own mental structures

in this book the author identifies the six elements that he believes are essential for behavioral change he postulates that if these elements are analyzed and manipulated behavioral change may be promoted and sustained he further discusses other factors that may promote or inhibit alteration of behavior and how they may be employed to understand and regulate change in human systems such as groups couples and societies the book also attempts to throw light on such phenomena as peak experiences fads fashion and political and religious movements the author s goal is to instruct people
