this course consists of standalone examples designed to illustrate specific skills there are no big applications built in this course you must use visual studio 2017 to be sure you have the latest version of c running lower versions of visual studio will cause errors because newer programming elements will not be found this is a beginners course but it is still detailed even when it s very technical this means in a few videos the author shows you the net framework source code he does this because it s important to look at things as they actually are and not at an artificially simplified perspective this course covers c through console programs only it does not have asp net windows forms mvc net core or anything like that the videos are just coding videos done in visual studio community 2017 this is the free version of visual studio this is a course dedicated to code only so you do not see any of the following a talking head powerpoints or fancy graphics all the code is written from scratch in the code editor window in visual studio community 2017 resource description page
