here we are on the banks of the nueces in the grand camp of the army of occupation so wrote lt napoleon jackson tecumseh dana when in 1845 not many months before the outbreak of the mexican war he joined the white tented encampment of general zachary taylor in texas and so he continued writing during the uncertain life of camp and campaign for the better part of the next two years in these letters to his wife published here for the first time dana provides a detailed firsthand view of the united states war with mexico fighting off the mexicans from within fort brown during the initial attack hearing the distant thunder of artillery as taylor s army marched to the rescue of the beleaguered seventh infantry occupying matamoros taking monterrey street by street with the defenders firing from the housetops after monterrey dana was at the siege of veracruz and on the march to cerro gordo badly wounded in the attack on telegraph hill at cerro gordo he was left on the field for dead but was rescued by a burial party a day and a half later following the mexican war dana went on to become a major general during the civil war and later to have an illustrious career as a railroad executive nearly one hundred of his letters about the mexican war survived and are now in the archives at west point from them robert ferrell has edited this vivid eyewitness narrative

turncoats and renegades is the first dedicated study of the practice of changing sides during the english civil wars it examines the extent and significance of side changing in england and wales but also includes comparative material from scotland and ireland the first half identifies side changers among peers mps army officers and common soldiers before reconstructing the chronological and regional patterns to their defections the second half delivers a cultural history of treachery by adopting a thematic approach to explore the social and cultural implications of defections and demonstrating how notions of what constituted a turncoat were culturally constructed side changing came to dominate strategy on both sides at the highest levels both sides reviled yet sought to take advantage of the practice whilst allegations of treachery came to dominate the internal politics of royalists and parliamentarians alike the language applied to turncoats and renegades in contemporary print is discussed and contrasted with the self justifications of the side changers themselves as they sought to shape an honourable self image for their families and posterity andrew hopper investigates the implementation of military justice along with the theatre of retribution surrounding the trial and execution of turncoats he concludes by arguing that far from side changing being the dubious practice of a handful of aberrant individuals it became a necessary survival strategy for thousands as they navigated their way through such rapidly changing events he reveals how side changing shaped the course of the english revolution even contributing to the regicide itself and remained an important political legacy to the english speaking peoples thereafter

preface adhesion is a phenomenon architects and civil engineers are not very familiar with in other disciplines knowledge about surface properties and the background of bonding energies is also far from satisfactory nevertheless there are many important applications in concrete engineering where adhesion is necessary for success and durability these include coating and painting repair of concrete surfaces bonding of fresh to old concrete crack injection glueing of precast elements glueing of steel to concrete etc in 1981 rilem established the technical committee 52 rac resin adherence to concrete the main aims of the committee s work were to collect research results and practical experiences to initiate and coordinate research programs to develop on a scientific base test methods for field and for laboratory purposes one of the results of the committee s work is a state of the art report which will be presented orally as a general report at the international symposium isap 86 and will be printed either in the rilem journal materials and structures or separately several test recommendations have been elaborated and will be prepared as drafts for the participants of isap 86 these are direct tensile test pull off test direct shear test slant shear test four point bending test dynamic loading test thermal compatibility test two versions injectibility test
