an intellectual history of man's most elusive yet coveted goal today we think of happiness as a natural right but people haven't always felt this way historian mcMahon argues that our modern belief in happiness is a recent development the product of a revolution in human expectations carried out since the eighteenth century he investigates that fundamental transformation by synthesizing two thousand years of politics culture and thought in ancient greek tragedy happiness was considered a gift of the gods during the enlightenment men and women were first introduced to the novel prospect that they could in fact should be happy in this life as opposed to the hereafter this recognition of happiness as a motivating ideal led to its consecration in the declaration of independence mcMahon then shows how our modern search continues to generate new forms of pleasure but also paradoxically new forms of pain from publisher description

epic into novel examines an unexplored tension in fielding's work the tension between his commitment to the classical tradition and his immersion in a print culture in which books were regarded as consumable commodities it gives a fresh account of fielding's engagement with classical literature showing how he fashioned his novels out of ancient epic it also shows how fielding drew on the language of cookery and consumption in order to characterize his relationship with the market this interest in the place of the ancients in a world of consumerism was inherited from the previous generation of satirists the scribblers among them jonathan swift john gay and alexander pope repeatedly suggest in their work that classical values are at odds with modern tastes and appetites fielding who had idolized these writers as a young man developed many of their satiric routines in his own writing but fielding broke from swift gay and pope in creating a version of epic designed to appeal to modern consumers henry power draws on a range of sources including eighteenth century cookery books as well as works of classical literature to offer fresh readings of works by swift gay and pope and of fielding's major novels

epic into novel explores fielding s engagement with various scriblerian themes primarily the consumption of literature but also the professionalization of scholarship and the status of the author it shows ultimately that fielding broke with the scriblerians in acknowledging and celebrating the influence of the marketplace on his work

here sian lewis considers the full range of female existence in classical greece childhood and old age unfree and foreign status and the ageless woman characteristic of athenian red figure painting ceramics are an unparalleled resource for women s lives in ancient greece since they show a huge number of female types and activities yet it can be difficult to interpret the meanings of these images especially when they seem to conflict with literary sources this much needed study shows that it is vital to see the vases as archaeology as well as art since context is the key to understanding which images can stand as evidence for the real lives of women and which should be reassessed

this book studies the working efficacy of leonard cohen s song hallelujah in the context of today s network culture especially as recorded on youtube k d lang s interpretation

s of cohen s hallelujah embody acoustically and visually viscerally what nietzsche named the spirit of music today the working of music is magnified and transformed by recording dynamics and mediated via facebook exchanges blog postings and video sites given the sexual religious core of cohen s hallelujah this study poses a phenomenological reading of the objectification of both men and women raising the question of desire including gender issues and both homosexual and heterosexual desire a review of critical thinking about musical performance as currency and consumed commodity takes up adorno s reading of benjamin s analysis of the work of art in the age of mechanical reproduction as applied to music radio sound and the persistent role of recording consciousness ultimately the question of what nietzsche called the becoming human of dissonance is explored in terms of both ancient tragedy and beethoven s striking deployment of dissonance as nietzsche analyses both as playing with suffering discontent and pain itself a playing for the sake not of language or sense but musically as joy

page dubois a classicist known for her daring and originality turns in this new book to one of the most troubling subjects in the study of antiquity the indispensability of slaves in ancient greece dubois argues that every object and text in the world of ancient greece bears the marks of slavery and the need to reiterate the distinction between slave and free and yet the ubiquity of slaves in ancient societies has been overlooked by scholars who idealize antiquity misconstrued by those who view

slavery through the lens of race and obscured by the split between historical and philological approaches to the classics dubois begins her study by exploring the material culture of slavery including how most museum exhibits erase the presence of slaves in the classical world shifting her focus to literature she considers the place of slaves in plato s meno aristotle s politics aesop s fables aristophanes wasps and euripides orestes she contends throughout that portraying the difference between slave and free as natural was pivotal to greek concepts of selfhood and political freedom and that scholars who idealize such concepts too often fail to recognize the role that slavery played in their articulation opening new lines of inquiry into ancient culture slaves and other objects will enlighten classicists and historians alike

a crucial text for any university course on the interaction of archaeology and the bible the world of early christians was not a world lived in texts it was a world saturated with material reality and concerns what where and when to eat or drink how to present oneself in the space of bodily life and that of death how to move from one place to another what impacted status or the adjudication of legal charges all these and more controlled so much of life in the ancient world the christians were not immune from the impact of these realities sometimes they absorbed their surrounds sometimes they quite explicitly rejected the material practices bearing in on them frequently they modified the practice and the rationale to create a significant christian alternative the collection of essays in this volume come

from a range of international scholars who for all their different interests and critical commitments are yet united in treasuring research into the greek and roman worlds in which christians sought to make their way they offer these essays in honor of one who has made a lifetime s work in mining ancient material culture to extract nuggets of insight into early christian dining practices dennis e smith features rich examples of method in the utilization of ancient material culture for biblical interpretation thirteen essays with a response from dennis e smith maps diagrams and plates

courtesans hetairas tawaif s j i s these women have exchanged artistic graces elevated conversation and sexual favors with male patrons throughout history and around the world in ming dynasty china and early modern italy exchange was made through poetry speech and music in pre colonial india through magic music chemistry and other arts yet like the art of courtesanry itself those arts have often thrived outside present day canons and modes of transmission and have mostly vanished without trace the courtesan s arts delves into this hidden legacy while touching on its equivocal relationship to geisha at once interdisciplinary empirical and theoretical the book is the first to ask how arts have figured in the survival or demise of courtesan cultures by juxtaposing research from different fields among cases studied by writers on classics ethnomusicology anthropology and various histories of art music literature and political culture are ming dynasty china twentieth century korea edo and modern japan ancient greece early modern italy and india past and present refusing a universal model the authors nevertheless share a perception that courtesans hover in the crevices of space time and practice between gifts and money courts and cities subtlety and flamboyance feminine allure and masculine power as wifely surrogates but keepers of culture what most binds them to their arts in our post industrialized world of global services and commodities they find is courtesans fragility as their cultures once vital to civilizations founded in leisure and pleasure are now largely forgotten transforming courtesans into national icons or historical curiosities or

the subject of sex was central to early chinese thought

discussed openly and seriously as a fundamental topic of human speculation it was an important source of imagery and terminology that informed the classical chinese conception of social and political relationships this sophisticated and long standing tradition however has been all but neglected by modern historians in the culture of sex in ancient china paul rakita goldin addresses central issues in the history of chinese attitudes toward sex and gender from 500 b c to a d 400 a survey of major pre imperial sources including some of the most revered and influential texts in the chinese tradition reveals the use of the image of copulation as a metaphor for various human relations such as those between a worshiper and his or her deity or a ruler and his subjects in his examination of early confucian views of women goldin notes that while contradictions and ambiguities existed in the articulation of these views women were nevertheless regarded as full participants in the confucian project of self transformation he goes on to show how assumptions concerning the relationship of sexual behavior to political activity assumptions reinforced by the habitual use of various literary tropes discussed earlier in the book led to increasing attempts to regulate sexual behavior throughout the han dynasty following the fall of the han this ideology was rejected by the aristocracy who continually resisted claims of sovereignty made by impotent emperors in a succession of short lived dynasties erudite and immensely entertaining this study of intellectual conceptions of sex and sexuality in china will be welcomed by students and scholars of early china and by those with an interest in the comparative development of ancient cultures

in the middle of the third century ce one north african bishop wrote a treatise for the women of his church exhorting them to resist such culturally normalized yet immodest behaviors in their cosmopolitan roman city as mixed public bathing in the nude and wearing excessive amounts of jewelry and makeup the treatise appears even more striking once we realize that the scandalous virgins to whom it was addressed were single women who had dedicated their virginity to christ stories like this one challenge the general assumption among christians today that the earliest christians were zealous converts who were much more counterculturally devoted to their faith than typical church goers today too often christians today think of cultural christianity as a modern concept and one most likely to occur in areas where christianity is the majority culture such as the american bible belt the story that this book presents refutes both of these assumptions cultural christians in the early church which aims to be both historical and practical argues that cultural christians were the rule rather than the exception in the early church using different categories of sins as its organizing principle the

book considers the challenge of culture to the earliest converts to christianity as they struggled to live on mission in the greco roman cultural milieu of the roman empire these believers blurred and pushed the boundaries of what it meant to be a saint or sinner from the first to the fifth centuries ce and their stories provide the opportunity to get to know the regular people in the early churches at the same time their stories provide a fresh perspective for considering the difficult timeless questions that stubbornly persist in our own world and churches when is it a sin to eat or not eat a particular food are women inherently more sinful than men and why is christian nationalism a problem and at times a sin ultimately recognizing that cultural sins were always a part of the story of the church and its people is a message that is both a source of comfort and a call to action in our pursuit of sanctification today
