this book examines the recent shift in us space policy and the forces that continually draw the us back into a space technology security dilemma the dual use nature of the vast majority of space technology meaning of value to both

civilian and military communities and being unable to differentiate offensive from defensive intent of military hardware makes space an area particularly ripe for a security dilemma in contrast to previous administrations the obama administration has pursued a less militaristic space policy instead employing a strategic restraint approach that stressed multilateral diplomacy to space challenges the latter required international solutions and the united states subsequently even voiced support for an international code of conduct for space that policy held until the chinese anti satellite asat test in 2013 which demonstrated expanded chinese capabilities this volume explores the issues arising from evolving space capabilities across the world and the security challenges this poses it subsequently discusses the complexity of the space environment and argues that all tools of national power must be used with some degree of balance toward addressing space challenges and achieving space goals this book will be of much interest to students of space policy defence studies foreign policy security studies and ir

ronnie lessem and alexander schieffer s integral green society and economy series has three overarching aims the first is to link together two major movements of our time one philosophical the other practical the philosophical movement is towards what many today are calling an integral age while the practical is the green movement duly aligned with that of sustainable development the second is to blend together elements of nature and community culture and spirituality science and technology politics and economics thus serving to bring about an integral green vision albeit with a focus on business and economics as such the authors transcend the limitations to sustainable development and environmental economics which are overly ecological if not also technological in orientation and exclude social and cultural elements thirdly this particular volume with darja piciga focuses specifically on slovenia as well as on europe generally drawing on the particular issues and capacities that this country and continent represents particularly for sustainable development and social knowledge based economy the emphasis on slovenia arose not only because it lies at the heart of europe but because a specific movement for an integral green slovenian society and economy has been co evolved there by the three editors in conjunction with slovene organisations communities and movements with a view to integrating existing and emerging knowledge resources initiatives and practices into a model as an alternative to austerity for slovenia and other european countries

why are fiberglass vaulting poles and hinged skates accepted in sport while performance enhancing drugs are forbidden are the rules that forbid them arbitrary should we level the playing field by allowing all competitors to use drugs that allow them to run faster or longer leap higher or lift more in this provocative exploration of what draws us to sport as participants and spectators thomas murray argues that the values and meanings embedded within our games provide the guidance we need to make difficult decisions about fairness and performance enhancing technologies good sport reveals what we really care about in sport and how the reckless use of biomedical enhancements undermines those values implicit in sports history rules and practices are values that provide a sturdy foundation for an ethics of sport that celebrates natural talents and dedication you see these values when the paralympics creates multiple level playing fields among athletes with different kinds of impairments they appear again in sports struggles to be fair to all when an extraordinary woman athlete emerges who appears to possess a mans hormone profile and muscles they are threatened when the effort to assure athletes a fair chance to win without doping is subverted by cheating or by corruption as in the case of russia's state supported doping operation performance enhancing drugs distort the connection between natural talents the dedication to perfect those talents and success in sport explaining the fundamental role of values and meanings good sport reveals not just what we champion in the athletic arena but also more broadly what we value in human achievement
