strange as it may seem cervantes s novel don quixote marc forster s film stranger than fiction shakespeare s play a midsummer night s dream pere borrell del caso s painting escaping criticism reproduced on the cover of the present volume and mozart s sextet a musical joke all share one common feature they include a meta dimension metaization the movement from a first cognitive referential or communicative level to a higher one on which first level phenomena self reflexively become objects of reflection reference and communication in their own right is in fact a common feature not only of human thought and language but also of the arts and media in general however research into this issue has so far predominantly focussed on literature where a highly differentiated albeit strictly monomedial

critical toolbox exists metareference across media remedies this onesidedness and closes the gap between literature and other media by providing a transmedial framework for analysing metaphenomena the essays transcend the current notion of metafiction pinpoint examples of metareference in hitherto neglected areas discuss the capacity for metaization of individual media or genres from a media comparative perspective and explore major historical forms and functions as well aspects of the development of metaization in cultural history stemming from diverse disciplinary and methodological backgrounds the contributors propose new and refined concepts and models and cover a broad range of media including fiction drama poetry comics photography film computer games classical as well as popular music painting and architecture this collection of essays which also contains a detailed theoretical introduction will be relevant to students and scholars from a wide variety of fields intermediality studies semiotics literary theory and criticism musicology art history and film studies

although it is fashionable among modernists to claim that globalism emerged only since ca 1800 the opposite can well be documented through careful comparative and transdisciplinary studies as this volume demonstrates offering a wide range of innovative perspectives on often neglected literary philosophical historical or medical documents texts images ideas knowledge and objects migrated throughout the world already in the pre modern world even if the quantitative level compared to the modern world might have been different in fact by means of translations and trade for instance global connections were established and maintained over the centuries archetypal motifs developed in many literatures indicate how much pre modern people actually shared but we also discover hard core facts of global economic exchange import of exotic medicine and on another level intensive intellectual debates on religious issues literary evidence serves best to expose the extent to which contacts with people in foreign countries were imaginable often desirable and at times feared of course the pre modern world was much more on the move and reached out to distant lands out of curiosity economic interests and political and military concerns diplomats crisscrossed the continents and artists poets and craftsmen traveled widely we can identify for instance both the vikings and the arabs as global players long before the rise of modern globalism so this volume promises to rewrite many of our traditional notions about pre modern worldviews economic conditions and the literary sharing on a global level as perhaps best expressed by the genre of the fable

this study reverses the question implicit in title of christa wolf s now canonical 1990 novella was bleibt what remains looking instead at what was lost during the process of german reunification it argues

that in their work during and after the wende most literary authors from both east and west germany responded ambivalently to the reunification many felt on the one hand a keen sense of loss as the gdr dissolved and an expanded federal republic summarily absorbed former eastern germany they mourned the ideals of democratic socialism tolerance and internationalism that the gdr had held dear as well as the country s rich cultural life on the other hand however they recognized that the gdr was a fundamentally corrupt surveillance state whose industry weighed heavily on the environment while failing to buoy the country s economy by looking at works by some of the most important authors from either side of the border this study shows that those who unequivocally embraced the reunification were clearly in the minority
