this upper division laboratory supplement for courses in abstract algebra consists of several mathematica packages programmed as a foundation for group and ring theory additionally the user s guide illustrates the functionality of the underlying code while the lab portion of the book reflects the contents of the mathematica based electronic notebooks students interact with both the printed and

electronic versions of the material in the laboratory and can look up details and reference information in the user's guide exercises occur in the stream of the text of the lab which provides a context within which to answer and the questions are designed to be either written into the electronic notebook or on paper the notebooks are available in both 2.2 and 3.0 versions of mathematica and run across all platforms for which mathematica exists a very timely and unique addition to the undergraduate abstract algebra curriculum filling a tremendous void in the literature
