Reports of the Lund University Chile Expedition, 1948-49 1951 the other kind of funnies refutes the mainstream american cultural assumption that comics have little to do with technical communication that the former are entertaining in a low brow sense and juvenile whereas the latter is practical and serious to the point of stuffiness the first of its kind this book demonstrates the exciting possibilities of using comics in technical communication it defines comics as a medium and art form that includes cartoons comic strips comic books and graphic novels provides conceptual and historical backgrounds on comics and discusses the appeals and challenges of using comics style technical communication more specifically it examines comics style instructions educational materials health risk communication and political propaganda communication the author argues that comics style technical communication encourages reader participation produces covert persuasion facilitates intercultural communication benefits underprivileged audiences such as children and readers of lower literacy and challenges the positivist view of technical communication an abundance of comics style technical communication examples carefully selected from across cultures and times demonstrates the argument while the book proposes that comics can create user friendly visually oriented engaging and socially responsible technical communication it is also quick to acknowledge the limitations and challenges of comics style technical communication and provides heuristics on how to cope with them the other kind of funnies is unique in its interdisciplinary approach it focuses on technical communication but speaks to design cultural and intercultural studies historical studies and to some extent education politics and art

Great Barrier Reef Expedition, 1928-29 1930 a unique recounting of the confederate use of landmines during the american civil war hess uses multiple archival sources to tell a compelling narrative that stresses not only the tactical and technological challenges but also considers the moral stigma attached to this new weapon of war

□□□□□□□□□□ 2013-10 journey into virtually uncharted territory and discover the wonderful uses of fleece allow author nancy cornweel to lead you on a sewing expedition adventures with polarfleece covers territories as fabric and garment care sewing machine and serger basics pattern choices and simple

design changes included are 200 photographs and 150 color illustrations to guide you on a tour of quick and easy techniques for seams ready to wear edge finishing and no hassle zippers nancy also shows a safety technique on how to avoid the dreaded frog mouth buttonhole adventures with polarfleece also includes a special excursion in ultrasuede drawcords patches button loops piping and pockets sculpturing polar pintucks and embroidery a collection of fifteen projects are included this sewing expedition has been photographed every step of the way and is clearly mapped and illustrated included are instructions for jackets pull overs a cape a five minuet hat blankets pillows exceptional accessories and more explore and discover the endless project possibilities for the entire family fleece is one of the sewing world's premier fabrics for comfort and warmth it is easy to sew with beautiful results nancy cornwell will lead you down a path of discovery filled with excitement intrigue and inspiration if the urge to explore is part of your nature adventures with polarfleece is sure to generate great excitement the heart of a fallen away sewer will soon be recaptured and new sewers will be intrigued and inspired

Biological Results of the Chatham Islands 1954 Expedition 1972 a classic work covering over 2 000 years of naval history from greek and roman galley warfare to vietnam

Reports of the Lund University Chile Expedition, 1948-49 1949 at the dawn of the twentieth century mankind had not yet achieved powered flight the main motive power then was provided by steam engines heavy dirty and inefficient if one wanted to travel over seas one had to travel on them a journey from london to new york by steam driven train and ship took more than 6 days by the time the same century drew to a close in december 1999 air travel was the normal choice for long journeys millions of people every day flew comfortably and safely in pressurised aluminium airliners propelled by simple clean and efficient gas turbine engines the same journey from london to new york could be achieved at supersonic speed in less than 6 hours for much of that century many of the extraordinary developments that moved aviation from fragile wood and fabric biplanes to supersonic transports were achieved on 330 acres of low lying former estate farmland in surrey england the estate was called brooklands those marshy acres were transformed from 1907 into the world's first custom built motor racing circuit then a rapidly developing aerodrome and finally one of the country's largest aircraft factories employing tens of thousands of people nearly 19 000 aircraft of many different types were built at brooklands during nine decades of peace and war by the 1980s however it was being eclipsed by larger manufacturing sites elsewhere with longer runways and better communications links its owner by then called british aerospace finally closed the factory in 1989 this book tells the history of those amazing developments through 100 of the key aircraft engines places and other objects that can still be seen either in or near brooklands museum or in other locations around the country it also highlights the stories of six designers whose inspiring creativity produced aircraft engines and weapons ranging from camel to concorde fury to harrier wellington to viscount merlin to olympus between them thomas sopwith barnes wallis rex pierson sydney camm stanley hooker and george edwards were responsible for much of what was designed built and flown not only at brooklands but elsewhere too the book is arranged in successive historical episodes but the many links between the objects and the designers should allow readers to follow different paths if they so wish it is not intended as a technical reference but rather to inspire the reader to seek out the objects and discover more about them

The Other Kind of Funnies 2016-12-14 our holidays lie near the heart of our emotional life enjoyed for a fortnight fed on imagination for eleven months of the year what we want from our holidays tells a lot about who we are and what we wish we were in this charming account fred inglis traces the rise of the holiday from its early roots in the grand tour through the coming of thomas cook and his blackpool packages to sex tourism and the hippie trail to kathmandu he celebrates the bodily pleasures of generations of tourists from edwardian banquets in paris to fish and chips on the beach from the bright young things on the riviera to the chosen hardships of the sea the desert wastes and the mountain tops he considers the ideals and the spiritual aspirations which are part of what we look for in a holiday but he also warns of a darker current how we have increasingly destroyed what we take most pleasure in and

how the dealings between those who have much and those who have little can seldom however good our intentions avoid the taint of exploitation

Preliminary Report on Expedition to Guadalupe Island 1960 popular mechanics inspires instructs and influences readers to help them master the modern world whether it s practical diy home improvement tips gadgets and digital technology information on the newest cars or the latest breakthroughs in science pm is the ultimate guide to our high tech lifestyle

Official Descriptive and Illustrated Catalogue of the Great Exhibition of the Works of Industry of All Nations, 1851 1851 covering the world s literature on meteorology climatology atmospheric chemistry and physics physical oceanography hydrology glaciology and related environmental sciences
