the speech situation is a term worn with age in the teaching of public speaking in
america that it is comprised of occasion speaker and topic is a gross
oversimplification it also includes challenge anxiety emotion fear responsibility
faults of memory and instants of pride out of the circumstances arise an increase
in heart rate a change in blood pressure an abnormal pattern of breathing a
noticeable build up in perspiration and an ongoing evaluation for students this
may be merely a grade or perhaps a series of evaluative remarks possibly

addressed both to the speaker and the other participants the audience it may entail a replaying of a record of the speech indeed a videotape most important is the lasting impression that remains with all of the participants what of the vocabulary of the speaker under the circumstances of the speech situation this speaker in the major portions of this work we may say this young man has spent time seeking an appropriate topic he has outlined a composition around a central idea or thesis he has marshaled evidence details he has framed an opening paragraph he has been admonished not to give an essay but to strive for audience contact interpersonal communication he makes his audible approach through his vocabulary and accompanying phonology under the tension the speaker repeats he adds meaningless vocalizations in periods that might logically be pauses there are slips of the tongue at worst failing he withdraws to await another day
