annotation if you know html css and javascript you already have the tools you need to develop android apps with this book you ll learn how to use these web technologies to design and build apps for any android device using the framework of your choice

Automating with STEP 7 in STL and SCL

2014-11-21

parallel processing can be ideally suited for the solving of more complex problems in statistical computing this book discusses code development in c and r before going beyond to look at the valuable use of these two languages in unison it covers linear equation solution with regression and linear models motivation optimization with maximum likelihood and nonlinear least squares motivation and random number generation while the text does require a working knowledge of basic concepts in statistics and experience in programming it does not require knowledge specific to c or r

Building Android Apps with HTML, CSS, and JavaScript

in hadamard matrices and their applications k j horadam provides the first unified account of cocyclic hadamard matrices and their applications in signal and data processing this original work is based on the development of an algebraic link between hadamard matrices and the cohomology of finite groups that was discovered fifteen years ago the book translates physical applications into terms a pure mathematician will appreciate and theoretical structures into ones an applied mathematician computer scientist or communications engineer can adapt and use the first half of the book explains the state of our knowledge of hadamard matrices and two important generalizations matrices with group entries and multidimensional hadamard arrays it focuses on their applications in engineering and computer science as signal transforms spreading sequences error correcting codes and cryptographic primitives the book s second half presents the new results in cocyclic hadamard matrices and their applications full expression of this theory has been realized only recently in the five fold constellation this identifies cocyclic generalized hadamard matrices with particular stars in four other areas of mathematics and engineering group cohomology incidence structures combinatorics and signal correlation pointing the way to possible new developments in a field ripe for further research this book formulates and discusses ninety open questions
