you probably already have a clear idea of what a  
discussion guide for students is a series of not very  
interesting questions at the end of a textbook chapter  
instead of triggering thought provoking class  
discussion all too often these guides are time  
consuming and ineffective this is not that kind of  
discussion guide what media classes really want to  
discuss focuses on topics that introductory textbooks  
generally ignore although they are prominent in  
students minds using approachable prose this book will  
give students a more precise critical language to  
discuss common sense phenomena about media the book  
acknowledges that students begin introductory film and  
television courses thinking they already know a great  
deal about the subject what media classes really want  
to discuss provides students with a solid starting  
point for discussing their assumptions critically and  
encourages the reader to argue with the book furthering  
the discussion on media in everyday life and in the  
classroom

from the preface since publishing the first edition of what i meant to be a guide to those who undertake to give kindergarten culture i have been in europe and made a special study of the kindergartens established

in hampburgh berlin and dresden by froebel himself and his most distinguished scholars this study has more and more confirmed the conviction i derived from reading froebel s essay on the education of the human race viz that no greater benefit could be conferred on our country than the far and wide spread of kindergartens as an underpinning so to say of our noble public school system giving adequate moral foundation thoroughness and practicality to the national education but i also learned that no book could be written that would make an expert kindergartner it was the careful observations and earnest experiments of half a century that gave to froebel himself that profound knowledge of childhood which enabled him to formulate the principles deduce the rules and call forth the spirit of a genuine art of education but though no genius and industry less than his own could have originated this art any soundly cultured intelligent genial tempered young woman who loves children can appreciate and practise it if and only if she is trained by a living teacher engaged in the work at the moment this i myself have proved experimentally also for my knowledge was first obtained only from books i had the best manuals and guides but did not know that they were intended merely for the convenience of already trained teachers and that they necessarily omitted the characteristic peculiarity of the method because written word cannot do justice to the fine steps by which the child is led to gradually carry its total spontaneity forwards on every plane of its little life artistic moral and intellectual for there is nothing merely mechanical and imitative in true kindergarten culture the child acts from within outwards in everything it does however seemingly trifling and if we use the word artist in its most general sense becomes an artist from the beginning thus is prevented that too common divorce between the powers of thinking and acting whose harmony ensures ability in a strict proportion to intellectual capacity

consciousness of aim and enjoyment of success at every step develop new ideas and power and fulfill that law of nature by which thought tends to rush into act instantly as in childish play nothing is more melancholy in experience than to see people drifting instead of living but this general failure of human life is owing to the fact that the unassisted child is baffled in its will and balked of its desires by a want of that steadiness of aim perseverance and knowledge of how to adapt means to ends which adult sympathy and wisdom should supply and from want of which it loses the original harmony of its being in the process of its growth
