1969

neuroscience the study of the structure and function of the brain has captured our imaginations breakthrough technologies permit neuroscientists to probe how the human brain works in ever more fascinating detail revealing what happens when we think move love hate and fear we know more than ever before about what goes wrong in the brain when we develop psychiatric and neurological illnesses like depression dementia epilepsy panic attacks and schizophrenia we also now have clues about how treatments for those disorders change the way our brains look and function neuroscience at the intersection of mind and brain has three main purposes first it makes complicated concepts and findings in modern neuroscience

accessible to anyone with an interest in how the brain works second it explains in detail how every experience we have from the moment we are conceived changes our brains third it advances the idea that psychotherapy is a type of life experience that alters brain function and corrects aberrant brain connections among the topics covered are what makes our brains different from those of other primates our nearest genetic neighbors how do life s experiences affect genetic expression of the brain and the way neurons connect with each other why are connections between different parts of the brain important in both health and disease what happens in the brains of animals and humans when we are suddenly afraid of something get depressed or fall in love how do medications and psychotherapies work the information in this book is based on cutting edge research in neuroscience psychiatry and psychology written by an author who studied human behavior and brain function for three decades it is presented in a highly accessible manner full of personal anecdotes and observations and touches on many of the controversies in contemporary mental health practice

Moral Psychology Today

2008-02-03

white women are one of the most influential demographics in america we are the largest voting bloc with purchasing power that exceeds anybody else s and when we unify to demand change we are a force to be reckoned with yet so many of us sit idly on the sidelines opting out of raising our hands to do learn and engage in ways that could make a difference why white american women are no monolith yet as women s march national organizer jenna arnold has learned over the past few years criss crossing the us in conversations with white women about their identity and role in the country we do possess common characteristics ones that get in the way of us becoming more engaged as citizens we re so focused on checking off our to do lists or so afraid of getting it wrong or so busy trying to avoid conflict that we are actively avoiding the urgent conversations we need to have we are confused about how we got here and unsure how to do better raising our hands is the reckoning cry for white women it asks us to step up and join the new frontlines of the fight against complacency torque for water pump bolts for 2023-08-06 9/19 2000 pontiac grand prix

in our homes in our behaviors and in our own minds consider raising our hands your starting place your intro to being a white woman in today s world freshman year class in these pages jenna peels back the history that s been kept out of textbooks and the cultural norms that are holding us back so we can finally start really listening to marginalized voices and doing our part to promote progress the american white woman is a powerful force an essential participant to mobilize alongside the rest of humanity on behalf of the world and we can no longer make excuses for why we don't have time or don't know enough
