*Environmental Success Stories* 2017-03-21 unlike many titles on environmental issues that portend a dark future environmental success stories delves into the most daunting ecological and environmental challenges humankind has faced and shows how scientists citizens and a responsive public sector have dealt with them successfully in addition to presenting the basic chemical and environmental science underlying problems like providing clean drinking water removing ddt and lead from agriculture and our homes and curtailing industrial pollution this book also discusses the political actors agency regulators and community leaders who have collaborated to enact effective legislation sharing the stories of the people organizations and governments who have addressed these problems successfully frank m dunnivant explains how we might confront the world s largest and most complex environmental crisis climate change now is the time for rededicated scientific exploration and enlightened citizen action to save our environment and dunnivant s book offers a stirring call to action

**Energy, the Environment and Climate Change** 2010 this book is a comprehensive account of all significant energy sources evaluated according to their capacity reliability cost safety and effects on the environment non renewable sources for example coal oil gas and nuclear fuel together with renewable sources like wood hydro biomass wind solar geothermal ocean thermal and tidal are considered also nuclear radiations and the disposal of nuclear waste and the future of nuclear power are assessed as well as pollution and acid rain the greenhouse effects and climate change its social political and moral problems are discussed with a special mention of the opposition to nuclear power

**Introduction to Energy and Climate** 2017-08-09 the purpose of this textbook is to provide a well rounded working knowledge of both climate change and environmental sustainability for a wide range of students students will learn core concepts and methods to analyze energy and environmental impacts will understand what is changing the earth s climate and what that means for life on earth now and in the future they will also have a firm understanding of what energy is and how it can be used this text intends to develop working knowledge of these topics with both technical and social implications students will find in one volume the integration and careful treatment of climate energy and sustainability

**Militarizing the Environment** 2015-12-21 as the seriousness of climate change becomes more and more obvious military institutions are responding by taking a prominent role in the governing of environmental concerns engaging in climate change war games and preparing for the effects of climate change from conflicts due to loss of food water and energy to the mass migration of millions of people displaced by rising sea levels this combat oriented stance stems from a self destructive pattern of thought that robert p marzec names environmentality an attitude that has been affecting human environmental relations since the seventeenth century militarizing the environment traces the rise of this influential mindset in america and other nations that threatens to supplant ideas of sustainability with demands for adaptation in this extensive historical study of scientific military political and economic formations across five centuries marzec reveals how environmentality has been instrumental in the development of

today's security society informing the creation of the military industrial complex during world war ii and the national security act that established the cia during the cold war now embedded in contemporary western thought environmentalism has even infiltrated scientific thinking transforming darwinian insights into a quasi theology that makes security the biological basis of existence marzec exposes the self destructive nature of this increasingly accepted worldview and offers alternatives that counter the blind alleys of national and global security

**The Environment and Climate Change Law Review 2022** john vogler examines the international politics of climate change with a focus on the united nations framework convention unfccc he considers how the international system treats the problem of climate change analysing the ways in which this has been defined by the international community and the interests and alignments of state governments

**Climate Change in World Politics 2016-02-02** climate change is not only one of the greatest threats to modern civilization it is also a great challenge to economic development in the 21st century global warming can lead to periods of both drought and intense rain causing crops to fail and ruining the livelihoods of many in underdeveloped countries the handbook of research on climate change impact on health and environmental sustainability is an authoritative reference source that offers a comprehensive and timely analysis of various aspects of global warming and its consequences featuring such topics as assessment of and adaptation to climate change water and its socio economic impact the environmental effects of climate change on human health and the mitigation of climate change on both a local and global level this expansive handbook is an essential reference source for students researchers academicians engineers government executives and other practitioners looking to make a difference in the treatment of our environment this publication features timely research on subjects including but not limited to climate change and its effect on both urbanization and the trade competitiveness of different regions water related diseases flourishing due to climate change health risks and rethinking health service provision losses from natural disasters farmers views on the environment drought management policies groundwater resource management trends in long term rainfall fishery management and productivity preserving biodiversity and sustainable forest use

*Handbook of Research on Climate Change Impact on Health and Environmental Sustainability* 2015-11-05 spatial planning has a vital role to play in the move to a low carbon energy future and in adapting to climate change to do this spatial planning must develop and implement new approaches elizabeth wilson and jake piper explore a wide range of issues in this comprehensive book on the relationship between our changing climate and spatial planning and suggest ways of addressing the challenges by taking a longer sighted approach to our preparation for the future this text includes an overview of what we know already about future climate change and its impacts as we attempt both to adapt to these changes and to reduce the emissions which cause them the role of spatial planning in relation to climate change offering some theoretical and political explanations for the challenges that planning faces in the coming decades a review of policy and legislation at international eu and uk levels in regard to climate change and the support this gives to the planning system case studies detailing what responses the uk and the netherlands have made so far in light of the evidence ways to help new and existing urban developments to reduce energy use and to adapt to climate change through strengthening the relationships between urban and rural areas to avoid water shortage floods or loss of biodiversity the authors take an evidence based look at this hugely important topic providing a well illustrated text for spatial planning professionals politicians and the interested public as well as a useful reference for postgraduate planning geography urban studies urban design and environmental studies students

**Spatial Planning and Climate Change 2010-09-13** this book presents a systems thinking approach in relation to the sustainable development goals for sustainable national development in vulnerable countries systems thinking is a process for understanding the interrelationships among the key components of a system this book illustrates sustainable development as a system key environmental issues are discussed showing their relationship to socioeconomic aspects of development in the light of increased climate threats and environmental disasters

**Systems Thinking for Sustainable Development 2018-01-29** this book offers a theoretically informed empirical investigation of national media reporting and political discourse on environmental issues in australia china and japan it illuminates the risks harms and responsibilities associated with climate change through an analysis of pollution adopting an interdisciplinary approach drawing on both the social sciences and humanities a particular strength of the work is the detailed analysis of the data using a range of both quantitative and qualitative techniques enabling the authors to reveal in rich and compelling detail the complex relationship between risk and responsibility in the climate change discourse the case studies of australia china and japan are set in the current literature as well as in the historical context of climate change in these three countries the analysis of the media discourse on the great barrier reef in australia demonstrates how the mining of coal for overseas markets has led to devastating harm to the life of the reef a critical discussion of the chinese documentary under the dome shows how this medium has played a crucial role in building awareness of the harm from atmospheric pollution among the citizens shaping attitudes and promoting action the first case study of japan elucidates how cross border atmospheric pollution from china forges a chain of responsibility for responding to climate change running from the state to society the other case study of japan demonstrates how smart cities have emerged as a way to mitigate the risks and harms of climate change the conclusion draws

together the similarities and differences in how climate change is addressed in the three countries in all environmental pollution and the media political discourses of risk and responsibility in australia china and japan uncovers the dynamics of the triadic relationship among risk harm and climate change in australia china and japan by so doing the book makes an original and timely contribution to understanding comparative media discourse and political debates on climate change

**Environmental Pollution and the Media** 2017-04-07 the year 2007 could perhaps accurately be described as the year when climate change finally received the attention that this challenge deserves globally much of the information and knowledge that was created in this field during the year was the result of the findings of the fourth assessment report ar4 of the intergovernmental panel on climate change ipcc which were disseminated on a large scale and reported extensively by the media this was the result not only of a heightened interest on the part of the public on various aspects of climate change but also because the ipcc itself proactively attempted to spread the findings of its ar4 to the public at large the interest generated on the scientific realities of climate change was further enhanced by the award of the nobel peace prize to the ipcc and former vice president of the us al gore by taking this decision in favour of a leader who has done a great deal to create awareness on climate change and a body that assesses all scientific aspects of climate change and disseminates the result of its findings the norwegian nobel committee has clearly drawn the link between climate change and peace in the world

*Facing Global Environmental Change* 2019-04-02 the acceleration of global climate change creates a nexus for the examination of power political rhetoric science communication and sustainable development this book takes an international view of twenty first century environmental communication to critically explore mediated expressions of climate change
